

Login

Canteen staff use this app to sign in and do canteen work on their phone. You open the app, tap to get started, then enter your username (or email) and password to sign in.

1. Welcome Screen

When you open the Canteen Staff app, you see a blue welcome screen.

- The screen shows **STAFF MANAGEMENT** in the middle.
- At the bottom there is a white button: **Lets Get Started**.

Canteen Staff – welcome screen

What to do: Tap **Lets Get Started** to go to the Sign In page.

2. Sign In Page

After you tap **Lets Get Started**, the Sign In page opens. You see the Ampersand Group logo at the top and a form below it.

Form fields:

- **Username or email** – Type the username or email that your school or admin gave you.
- **Password** – Type your password. The characters are hidden as you type.

Button: Tap the red **Sign In** button to sign in. After a successful sign in, you go to the next screen (for example the school list or dashboard).

Canteen Staff – Sign In form

Outcome

Canteen staff open the app and see the welcome screen, then tap **Lets Get Started** to open the Sign In page. They enter **Username or email** and **Password**, can use **Remember me** and **Trouble Logging In?**, then tap **Sign In** to log in. Contact Support and User Manual are available on the Sign In page for help.

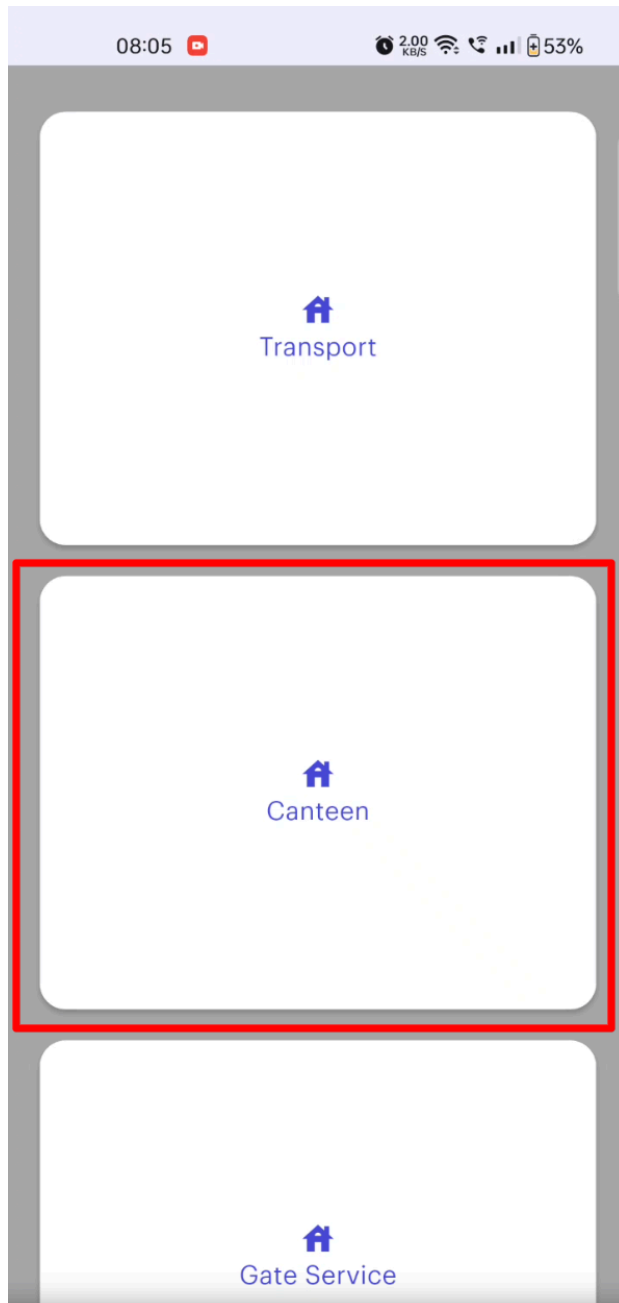

Dashboard

After you sign in, you see a list of services. Tap **Canteen** to open the canteen dashboard.

1. Choose Service

After login, you see service cards. Each card is one module you can open.

- **Canteen** – Tap this to open the canteen dashboard.

Choose service – Transport, Canteen, Gate Service

What to do: Tap the **Canteen** card.

2. Canteen Dashboard

When you tap **Canteen**, the dashboard opens.

Top of the screen:

- **Back arrow** – Go back to the service list.
- **Dashboard** – Screen title.
- **Hello,** – User greeting.
- **School selector** – Shows schools the user can access. Select one school from this dropdown.

Important: The selected school is used for all actions and all logging done from this app.

3. Tiles on dashboard

You will see tiles under the Canteen section.

Always shown:

- **Ala-Carte** – For ala-carte orders.
- **Complimentary Meals** – For complimentary entries.
- **Alternate Payments** – For alternate payment flow.

Conditional tile based on selected school and current date:

- If a food festival is **happening** today for the selected school, you see **Food Festival**.
- If no food festival is **happening** today for the selected school, you see **Meal Logging**.

Food Festival

Canteen dashboard – Food Festival shown when happening

Tap any tile to open that module.

Outcome

After login, the user selects **Canteen** and opens the dashboard. The user then selects a school from the **School selector**. That selected school is used for every action and logging. The dashboard always shows **Ala-Carte**, **Complimentary Meals**, and **Alternate Payments**. The fourth tile depends on date and school: **Food Festival** when a food festival is **happening** today for that school, **Meal Logging** when no food festival is **happening** today.

Meal Logging

Meal Logging is where canteen staff **scan a student's or staff member's ID card** to see their meal plan or coupon, then **tap a button to log** that a meal (e.g. snacks, lunch, evening snacks) was served. The app shows when the next serving window starts, whether the plan or coupon is active, and how many meals are left. You can read **Allergens** before serving. If a meal was already served today and you must give another plate for a valid reason, use **Serve again**; that does **not** add to the availed count.

Meal times (serving windows)

Your school sets **meal times** in the admin panel under **Canteen Setting Rules**. These times are the **serving windows** for each meal type. The mobile app uses them to decide when you can log a meal. If you scan before a window starts, the app shows a message like “The next serving window starts at 9:00 am (Snack Time).”

Common variables:

- **Lunch Time** – e.g. 12:00 – 14:30 (lunch can be served in this period).
- **Snack Time** – e.g. 09:30 – 10:00 (morning snacks in this period).
- **Evening Snack Time** – e.g. 17:00 – 18:00 (evening snacks in this period).

The list below is an example. Your school's values can be different. Only an admin can add or change these rules.

Academic Year	School	Variable	Value	Action
2025 - 26	VIBGYOR Kids and High	Lunch Time	12:00:00-14:00:00	Edit
2025 - 26	VIBGYOR Kids and High	Snack Time	09:00:00-10:30:00	Edit
2025 - 26	VIBGYOR Kids and High	Evening Snack Time	17:30:00-18:30:00	Edit
2025 - 26	VIBGYOR Kids and High	Max Coupon Purchase Amount	Rs.1000	Edit
2025 - 26	VIBGYOR Kids and High	Min Coupon Purchase Amount	Rs.20	Edit

Canteen Setting Rules – meal times and coupon limits

1. Open Meal Logging (Dashboard)

From the canteen dashboard you see **Meals** with **Meal Logging** and **Ala-Carte**, and **Others** with **Complimentary Meals**.

Hello, dummyps1 1

Meals

Meal Logging

Ala-Carte

Others

Complimentary Meals

What to do: Tap **Meal Logging** to open the meal logging flow.

2. Scan ID card (Student or Staff)

The Meal Logging screen opens with a **Scan ID card** area.

- **Title:** Meal Logging (back arrow to go back).
- **Heading:** Scan ID card.
- **Instruction:** Place ID card inside the frame to scan. A frame with corner brackets shows where to hold the ID card.
- **Forgot ID?** – Tap this if the person does not have their ID card.

Meal Logging – Scan ID card screen

Meal Logging – Scan ID card screen

What to do: Point the camera at the student's or staff member's ID card so it sits inside the frame. The app reads the ID card and opens a **Student Profile** or **Staff Profile** screen.

3. Student Profile – What You See

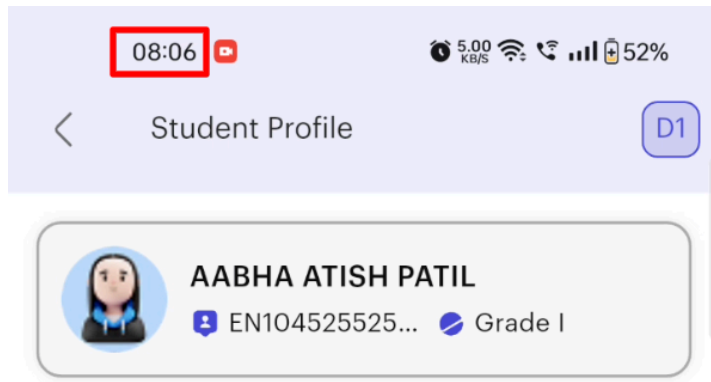

After you scan a **student's** ID card, the **Student Profile** screen appears. What you see depends on the student's plan, the time of day, and serving windows.

3.1 Next serving window not started yet

The app uses the school's meal times (see **Meal times (serving windows)** above) to show when the next meal window starts. If the current time is before that window, the app shows a message and you cannot serve that meal until the window starts.

Example – Snack Time:

“The next serving window starts at 9:00 am (Snack Time).”

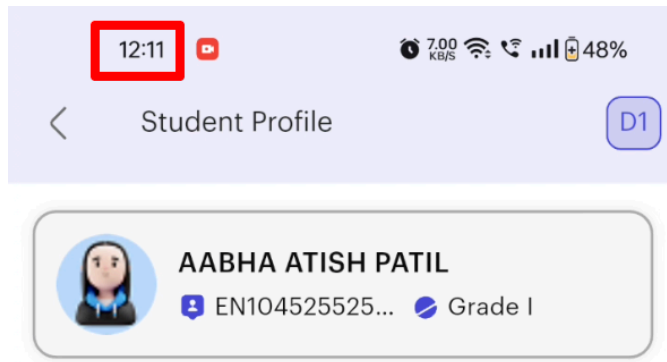

The next serving window starts at 9:00 am (Snack Time)

Student Profile – next serving window Snack Time

Example – Lunch Time:

“The next serving window starts at 1:00 pm (Lunch Time).”

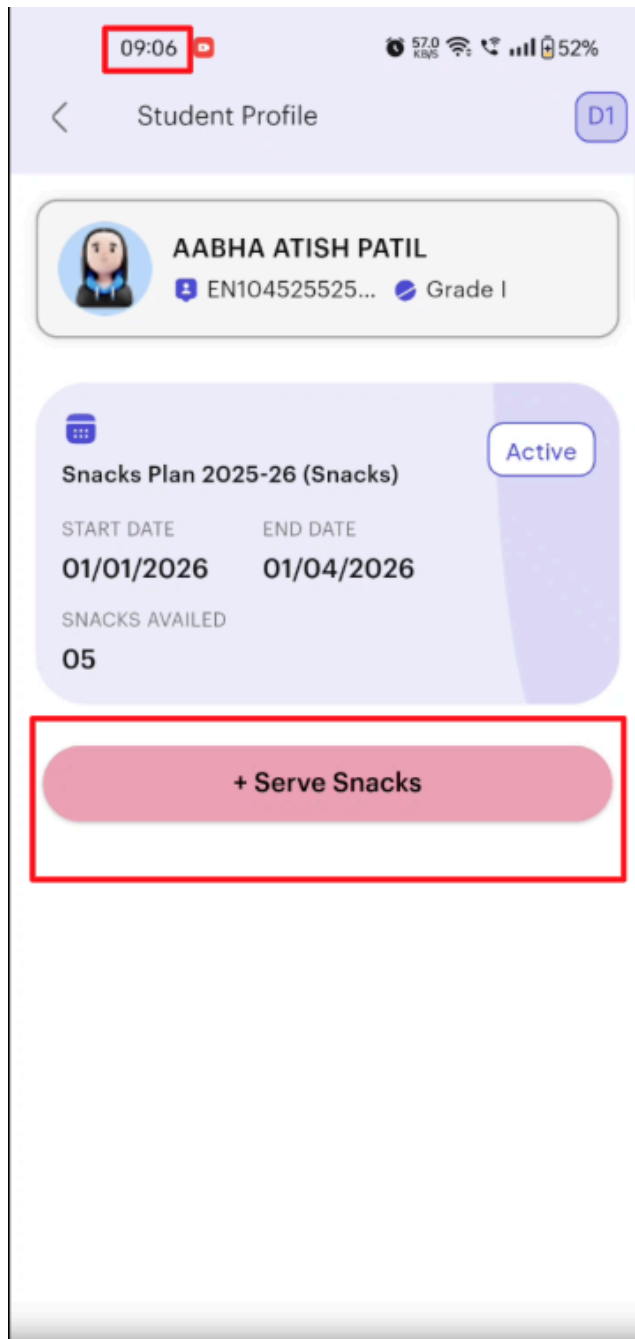

The next serving window starts at 1:00 pm (Lunch Time)

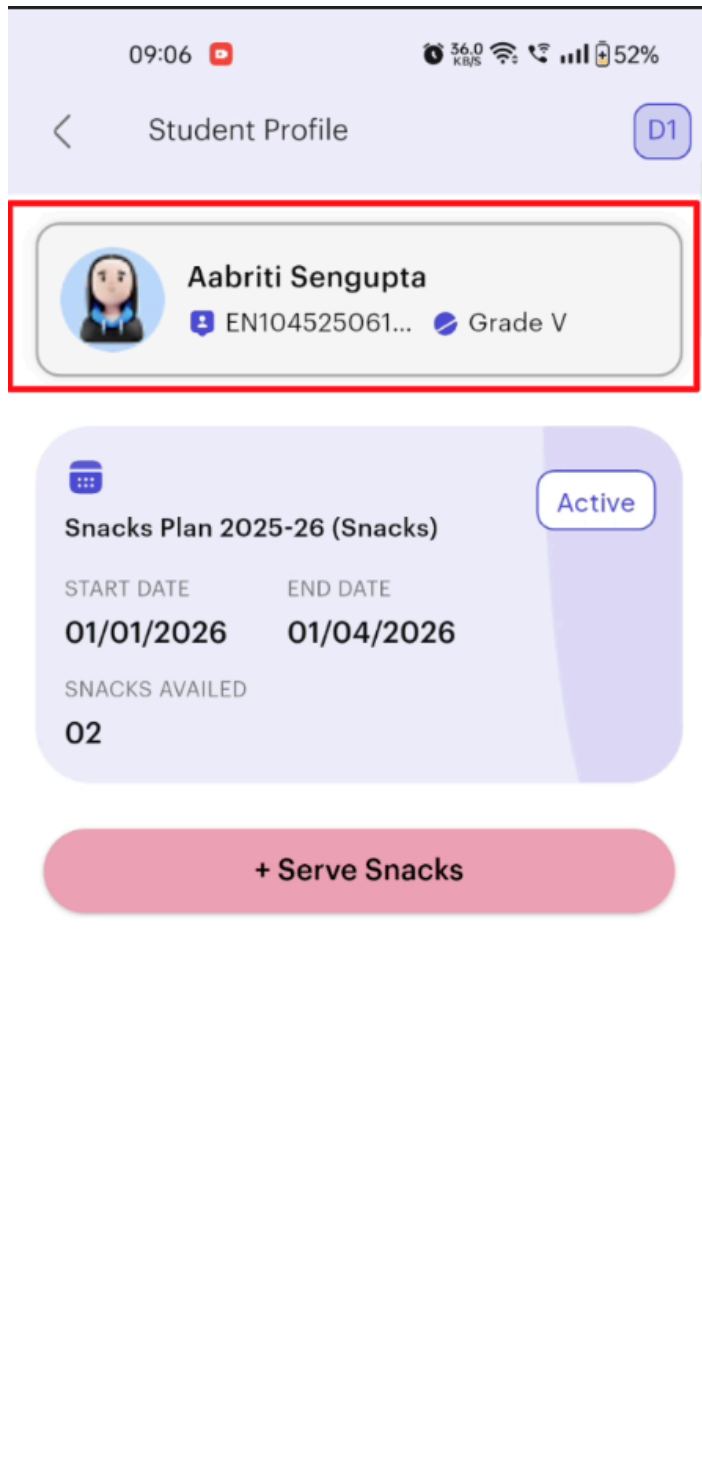

Student Profile – next serving window Lunch Time

3.2 Snacks – Term pass (plan) active

The student has an active **Snacks Plan** (e.g. Snacks Plan 2025-26). You see start/end dates and **Snacks Available**. A pink **+ Serve Snacks** button appears.

Student Profile – Snacks Plan active, Serve Snacks

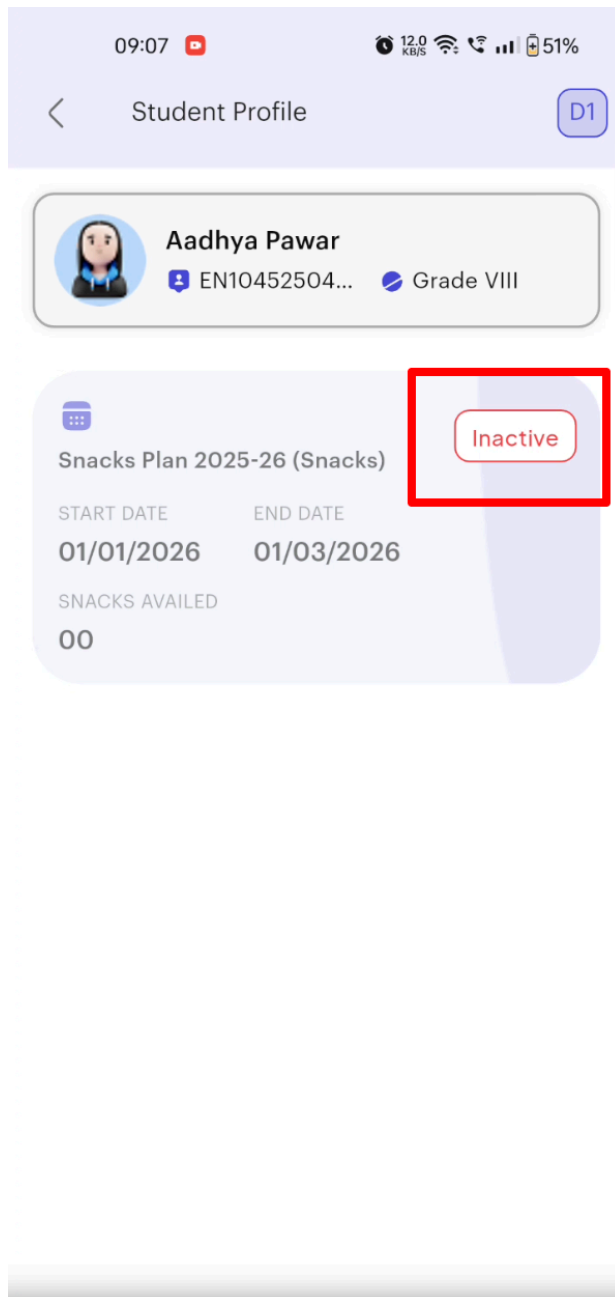

Student Profile – Snacks Plan active, another example

Tap **+ Serve Snacks** to log that you served snacks.

3.3 Snacks – Plan inactive

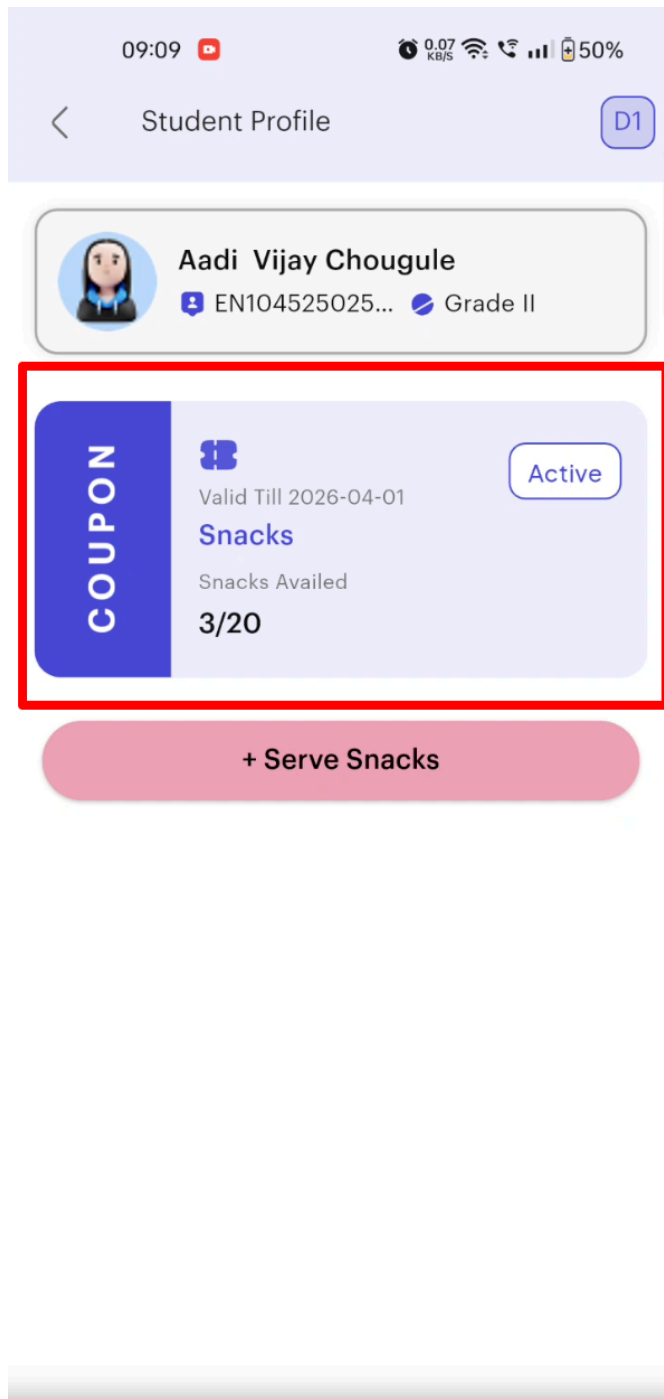

The student has a **Snacks Plan** but it is **Inactive**. You see the plan card with “Inactive”. You cannot serve snacks for this plan.

Student Profile – Snacks Plan Inactive

3.4 Snacks – Meal pack (coupon) active

The student has a **COUPON** (meal pack) for **Snacks**. You see **Valid Till**, **Snacks Available** (e.g. 3/20), and **Active**. A pink **+ Serve Snacks** button appears.

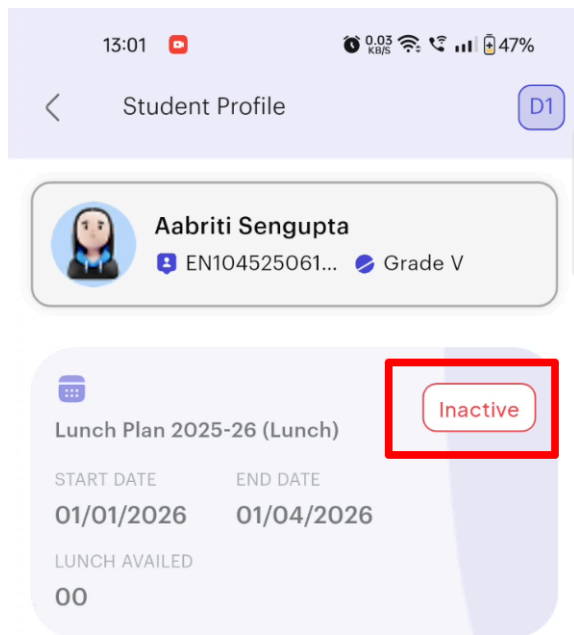

Student Profile – Snacks coupon active, Serve Snacks

Tap + **Serve Snacks** to log the serving. The availed count will increase.

3.5 Lunch – Plan inactive

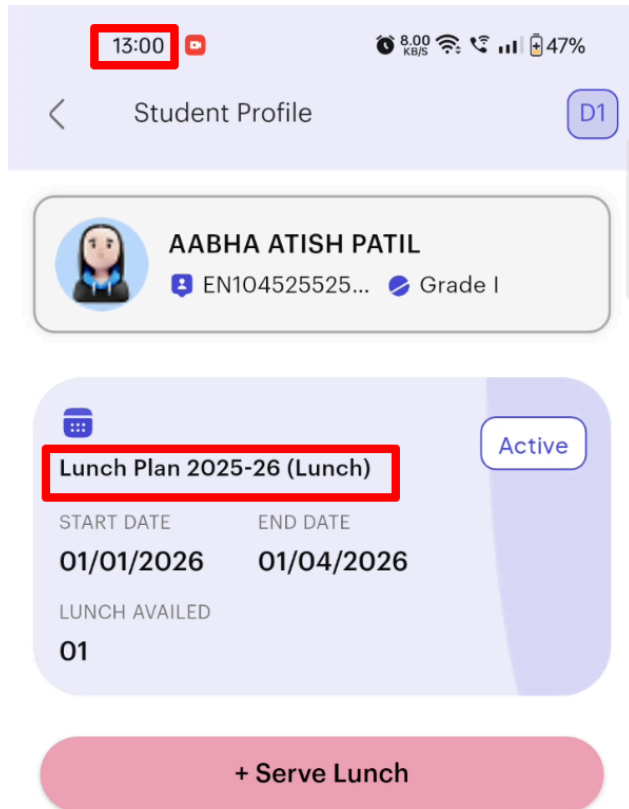

The student has a **Lunch Plan** but it is **Inactive**. You see the plan with “Inactive”. You cannot serve lunch for this plan.

Student Profile – Lunch Plan Inactive

3.6 Lunch – Term pass active

The student has an active **Lunch Plan**. You see **Lunch Aailed** (e.g. 01). A pink **+ Serve Lunch** button appears.

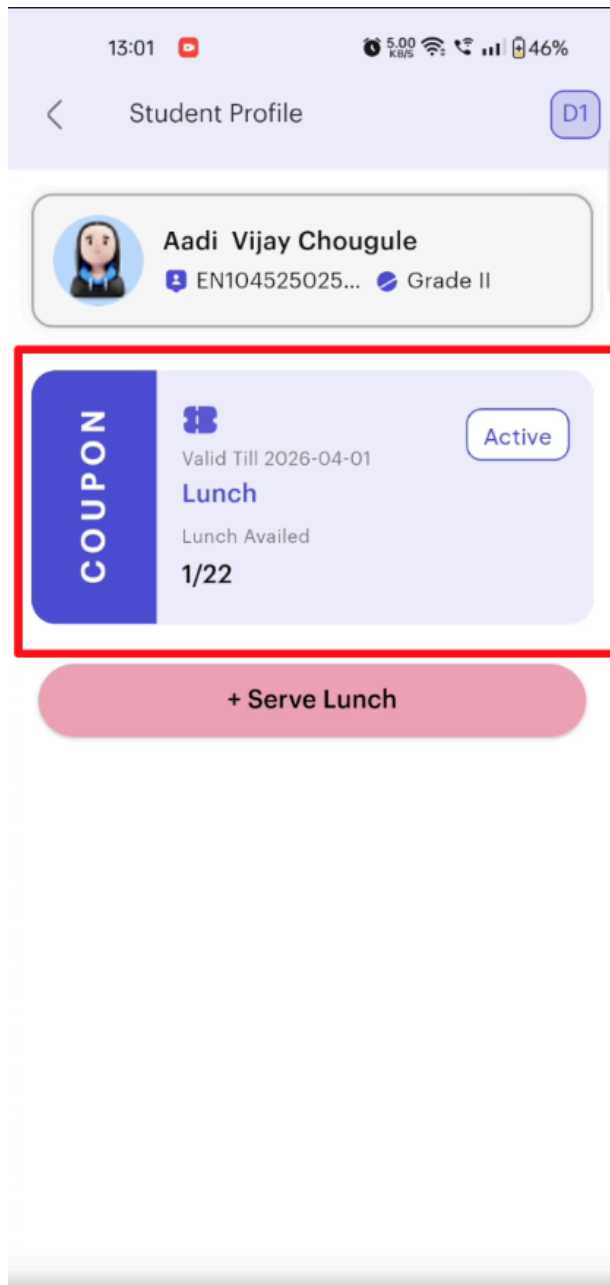

Student Profile – Lunch Plan active, Serve Lunch

Tap **+ Serve Lunch** to log the serving.

3.7 Lunch – Meal pack (coupon) active

The student has a **COUPON** for **Lunch**. You see **Lunch Aailed** (e.g. 1/22) and **Active**. A pink **+ Serve Lunch** button appears.

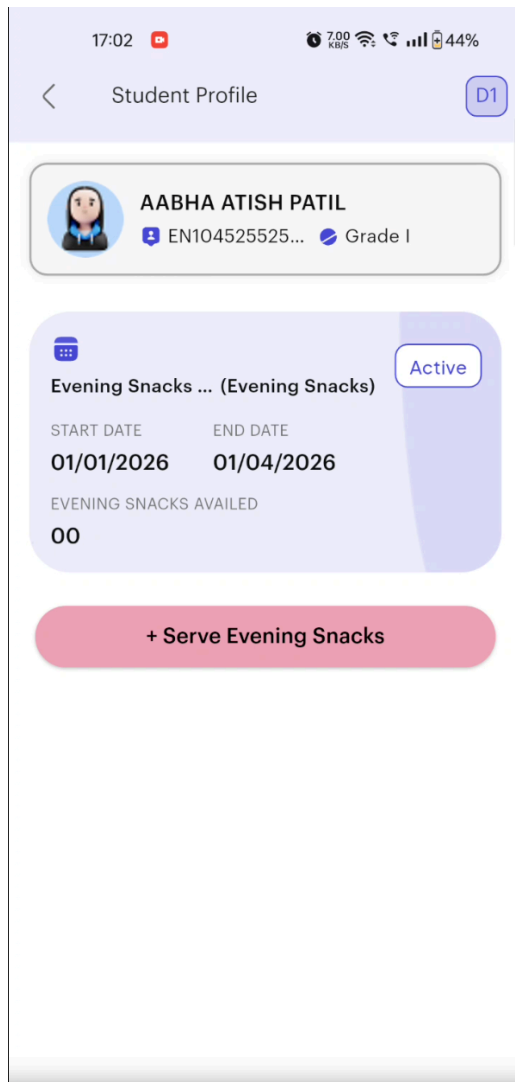

Student Profile – Lunch coupon active, Serve Lunch

Tap **+ Serve Lunch** to log the serving.

3.8 Evening Snacks – Term pass active

The student has an active **Evening Snacks** plan. You see **Evening Snacks Available** (e.g. 00). A pink **+ Serve Evening Snacks** button appears.

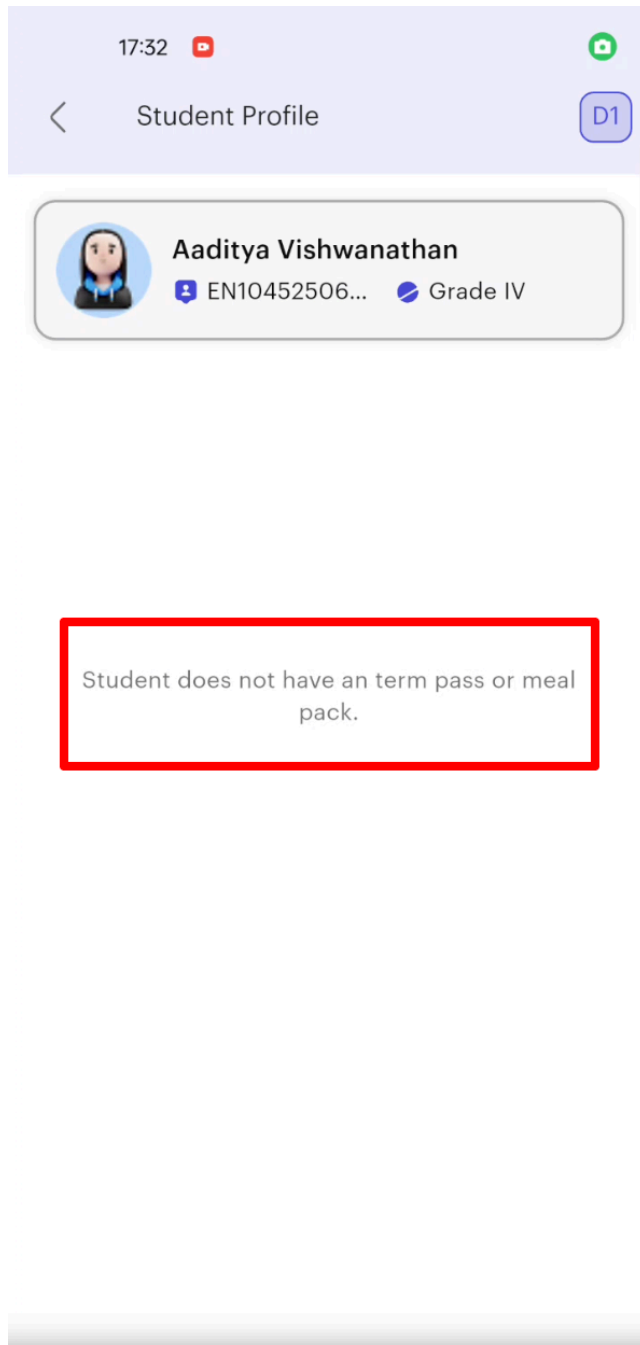

Student Profile – Evening Snacks plan active, Serve Evening Snacks

Tap **+ Serve Evening Snacks** to log the serving.

3.9 No term pass or meal pack

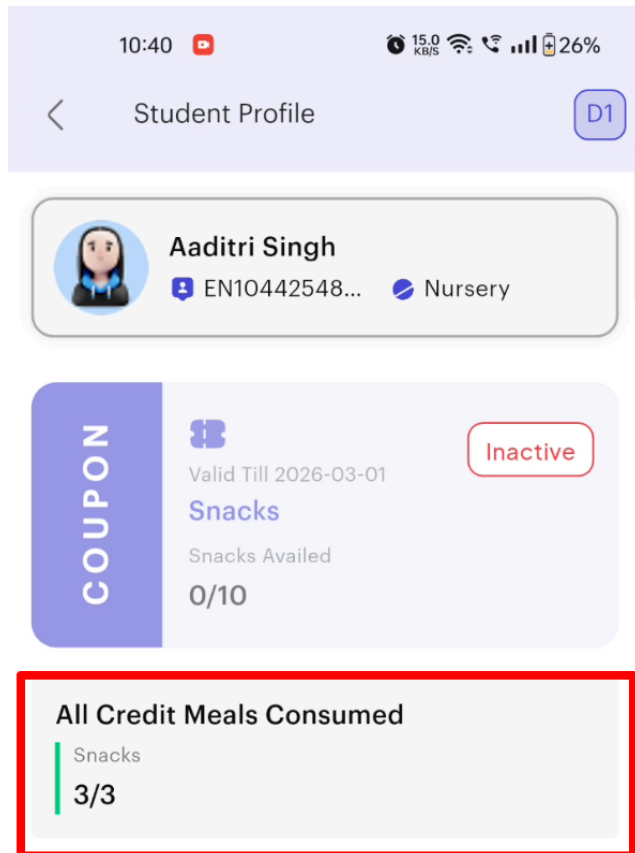

The app shows: “**Student does not have an term pass or meal pack.**” You cannot log a meal for this student from this screen.

Student Profile – no term pass or meal pack

3.10 All credit meals consumed

The app shows **All Credit Meals Consumed** (e.g. Snacks 3/3). The coupon shows **Inactive**. All credit meals are used; you cannot serve more credit meals for that type.

Student Profile – All Credit Meals Consumed

3.11 Allergens (student)

On **Student Profile**, if the student has allergies, an **Allergens** section lists them as tags (e.g. Dry Fruits, Eggs, Milk). Read these before you serve food.

Student Profile – Allergens

4. Staff Profile – Serve Snacks

When you scan a **staff member's** ID card, you see **Staff Profile** with their name, ID, and role, and a **COUPON** card for **Snacks**.

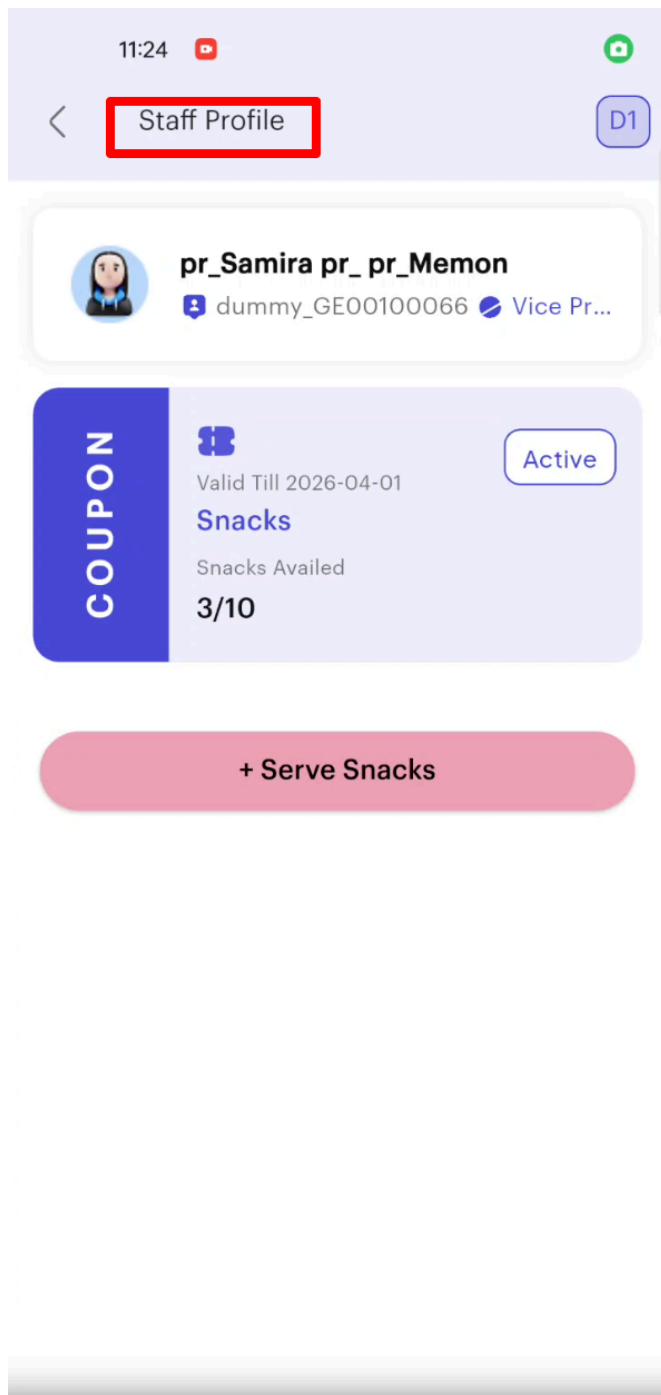

4.1 Allergens (staff)

On **Staff Profile**, if the staff member has allergies, an **Allergens** section lists them as tags (e.g. Banana, Chocolate). Read these before you serve food.

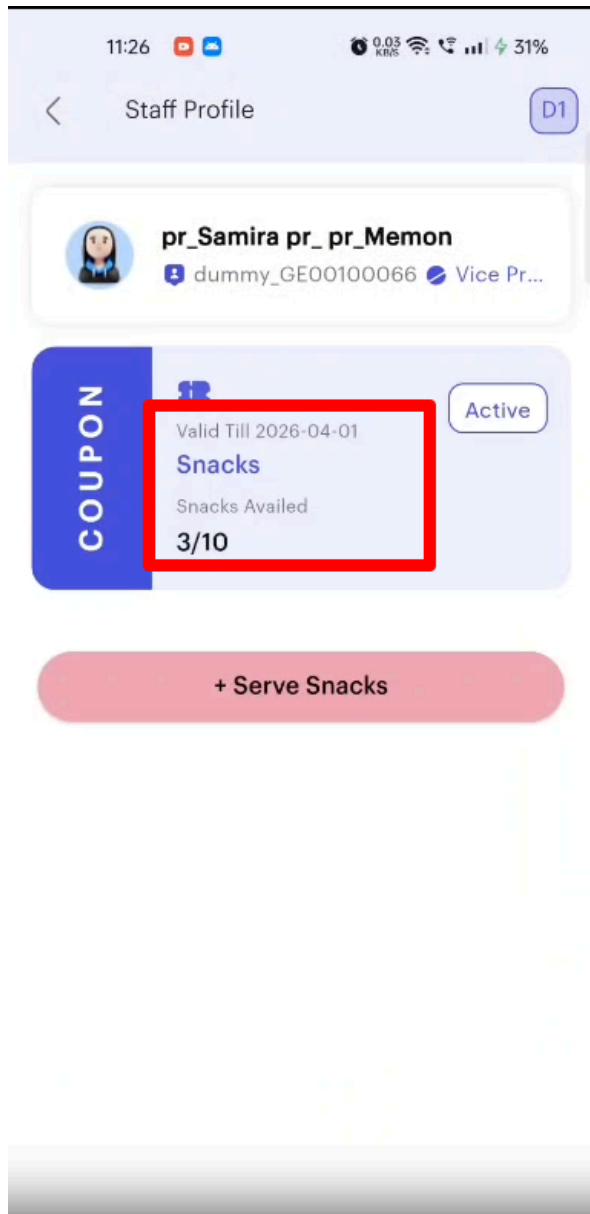

Staff Profile – Allergens

- The coupon shows **Valid Till**, **Snacks**, and **Snacks Availed** (e.g. 3/10).
- If the coupon is **Active**, a pink **+ Serve Snacks** button appears.

Staff Profile – Snacks coupon, Serve Snacks

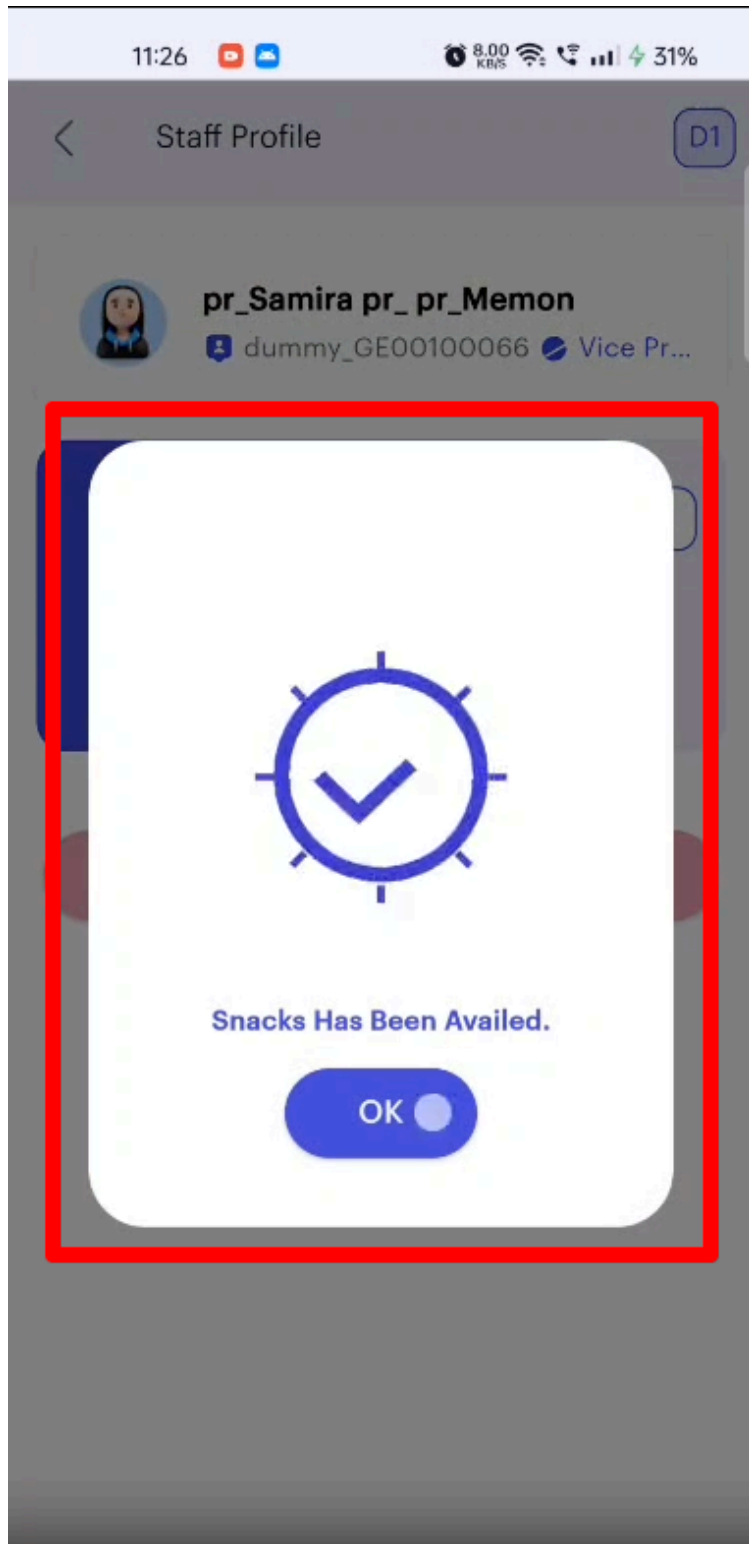

Before serving: You see the current count (e.g. Snacks Availed 3/10).

Staff Profile – coupon details before serve

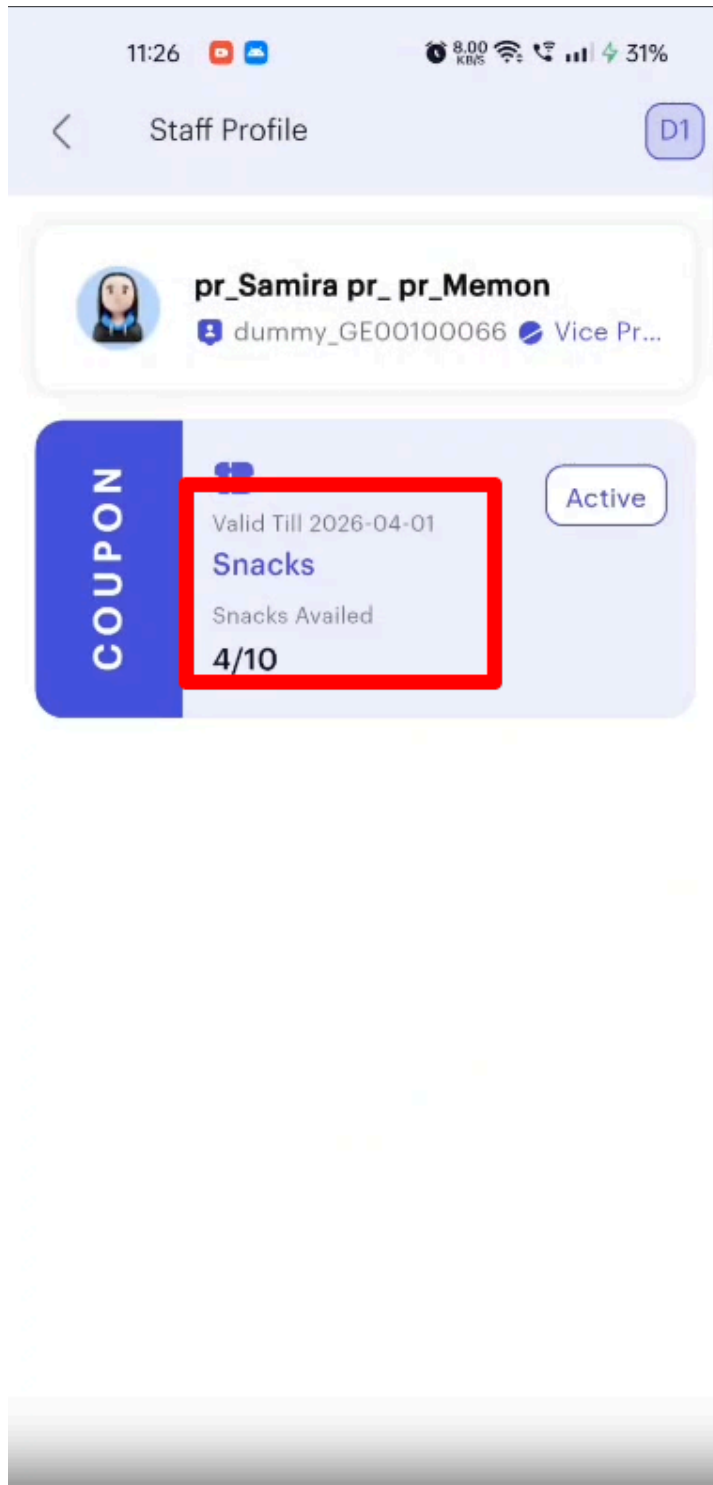

What to do: Tap **+ Serve Snacks**. The app records the serving.

Success message: A pop-up appears: **“Snacks Has Been Aailed.”** Tap **OK** to close it.

Success – Snacks Has Been Availed

After serving: Back on Staff Profile, **Snacks Availed** increases (e.g. from 3/10 to 4/10).

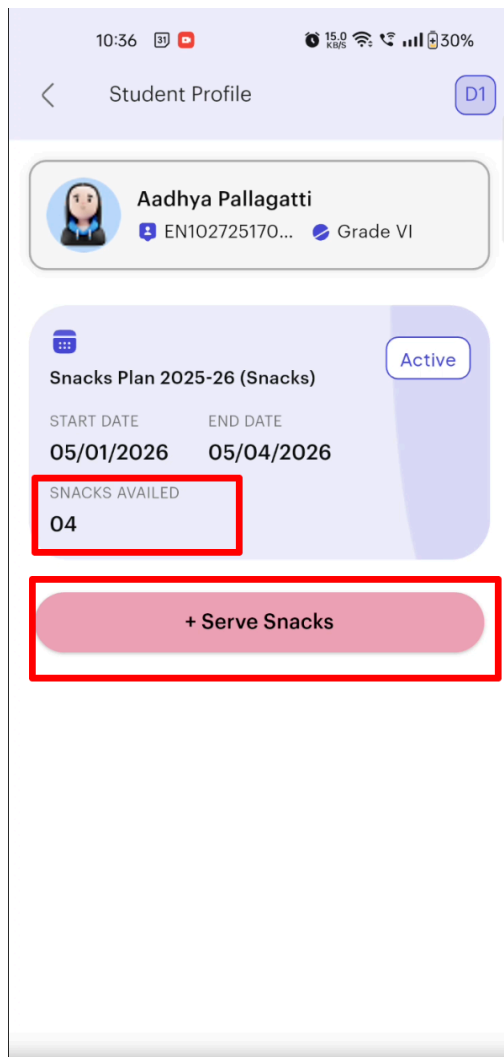

Staff Profile – Snacks Aailed updated after serve

5. After you tap Serve (Student – Term pass or Meal pack)

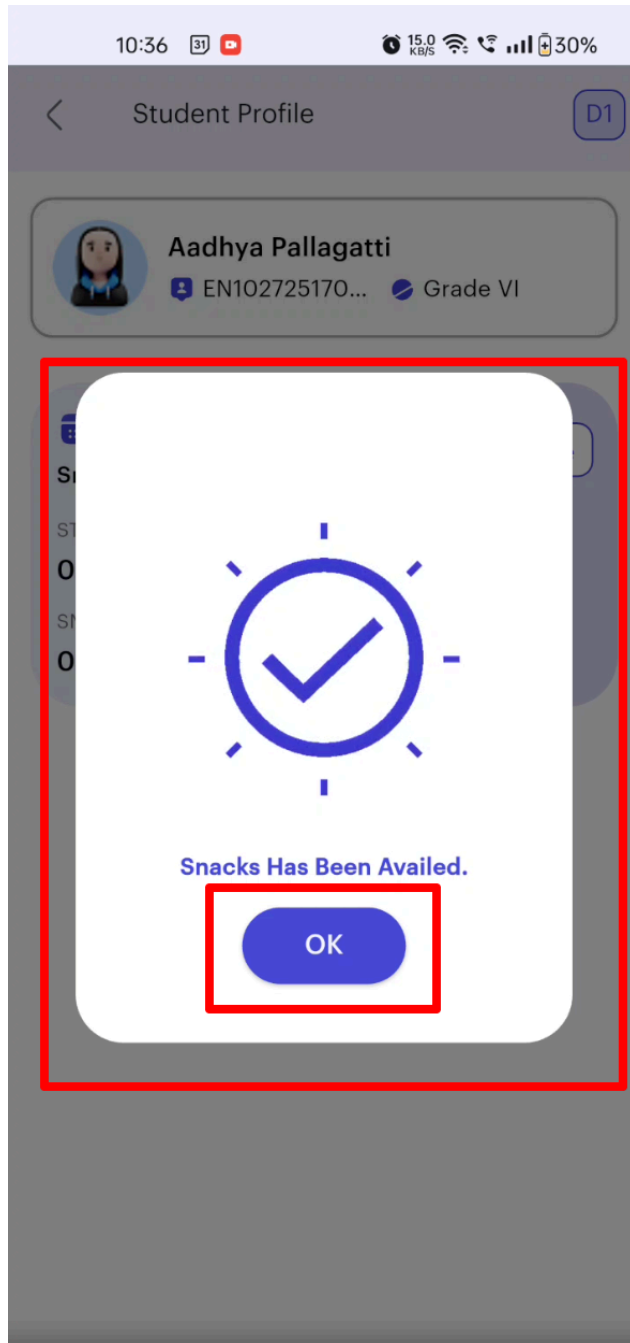

When you tap **+ Serve Snacks** or **+ Serve Lunch** on a student's profile, the app records the meal. You see a success message, then the profile shows the new “availed” count.

Term pass (e.g. Snacks Plan) – before: Student Profile shows the plan and **SNACKS AVAILABLE** (e.g. 04). You tap **+ Serve Snacks**.

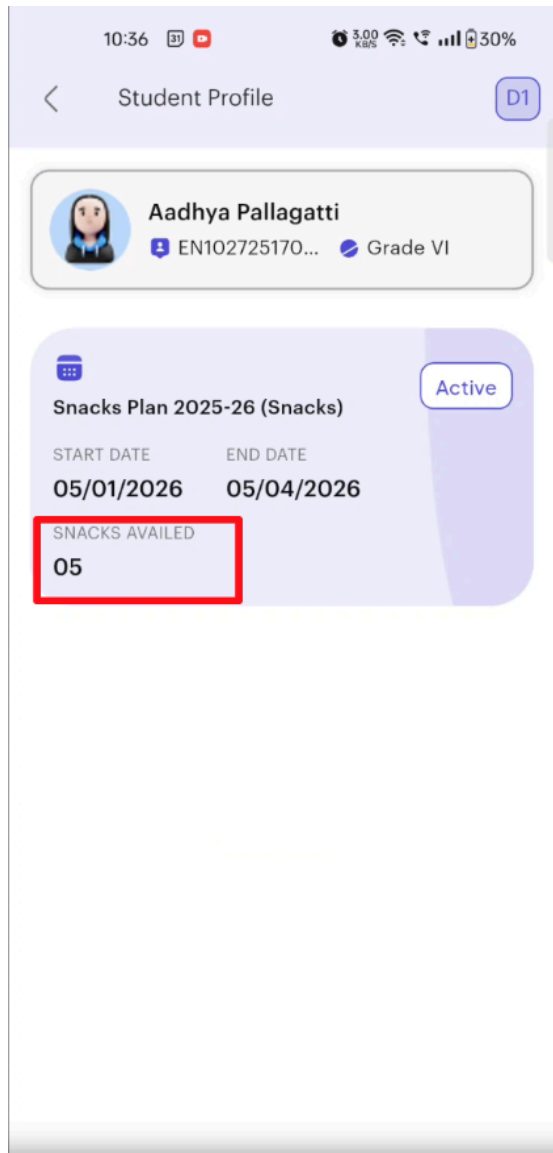

Student Profile – Snacks Plan, before serve

Success dialog: A pop-up appears: **“Snacks Has Been Availed.”** Tap **OK** to close it.

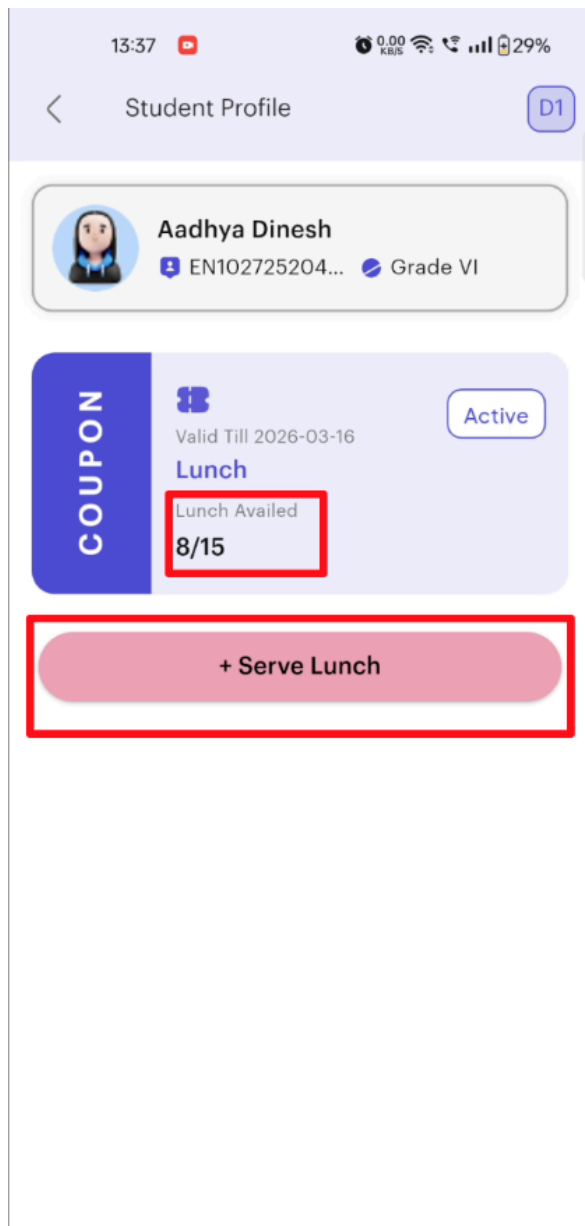

Success – Snacks Has Been Aailed

After serve: Back on Student Profile, **SNACKS AVAILABLE** increases (e.g. from 04 to 05).

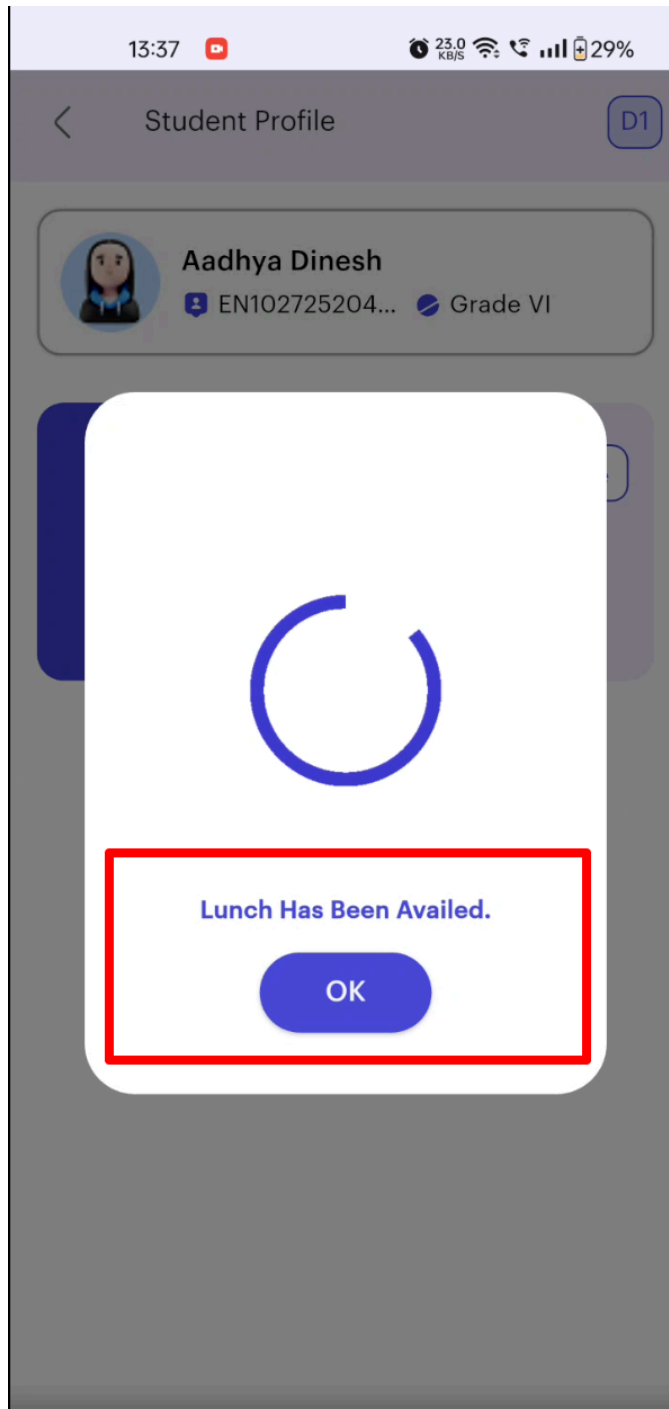

Student Profile – Snacks availed count updated

Meal pack (coupon) – before: Student Profile shows the **COUPON** (e.g. Lunch) and **Lunch Availed** (e.g. 8/15). You tap + **Serve Lunch**.

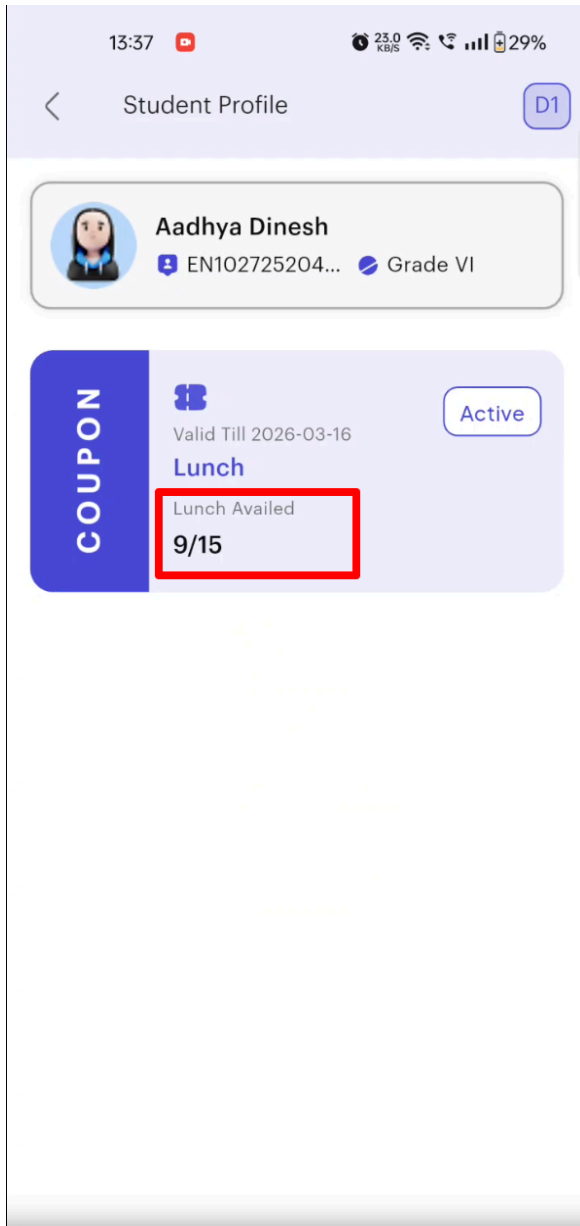

Student Profile – Lunch coupon, before serve

Success dialog: A pop-up appears: “**Lunch Has Been Aailed.**” Tap **OK** to close it.

Success – Lunch Has Been Aailed

After serve: Back on Student Profile, **Lunch Aailed** increases (e.g. from 8/15 to 9/15).

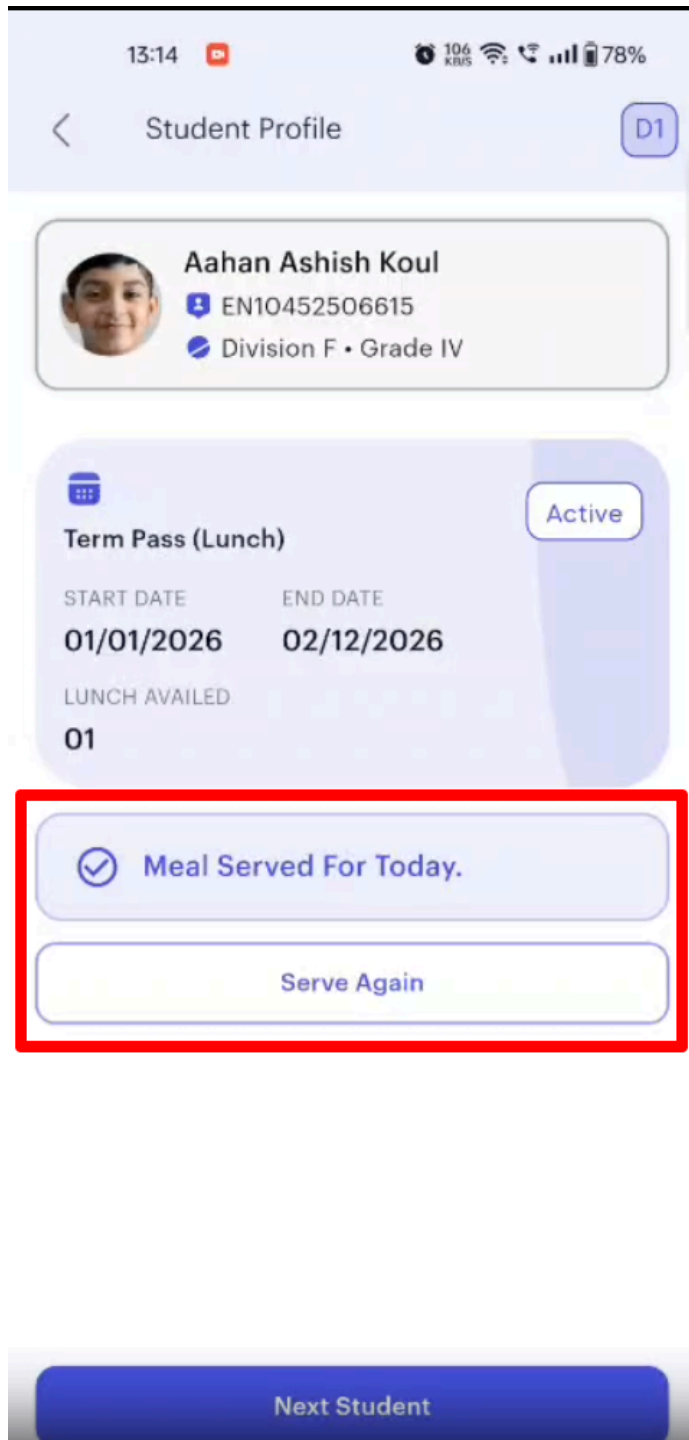

Student Profile – Lunch availed count updated

6. Serve again (student or staff)

Sometimes the meal was already served for today, but you must give another plate (for example the meal spilled, something was wrong with the food, or the packaging was damaged). Use **Serve again** for that case.

On **Student Profile** or **Staff Profile**, when today's meal is already logged, you see **Meal Served For Today** and a **Serve Again** button.

Student Profile – Meal served for today, Serve Again

What to do: Tap **Serve Again**. The **Serve Again** screen opens. Under **Reason**, choose one option (for example **Meal Spilled**, **Foreign Object Found in Meal**, or **Packaging Damaged**). Tap the blue **Serve Again** button to confirm.

13:14 8.00 KB/S 78%

< Serve Again D1

Reason

☒ Meal Spilled

☐ Foreign Object Found in Meal

☐ Packaging Damaged

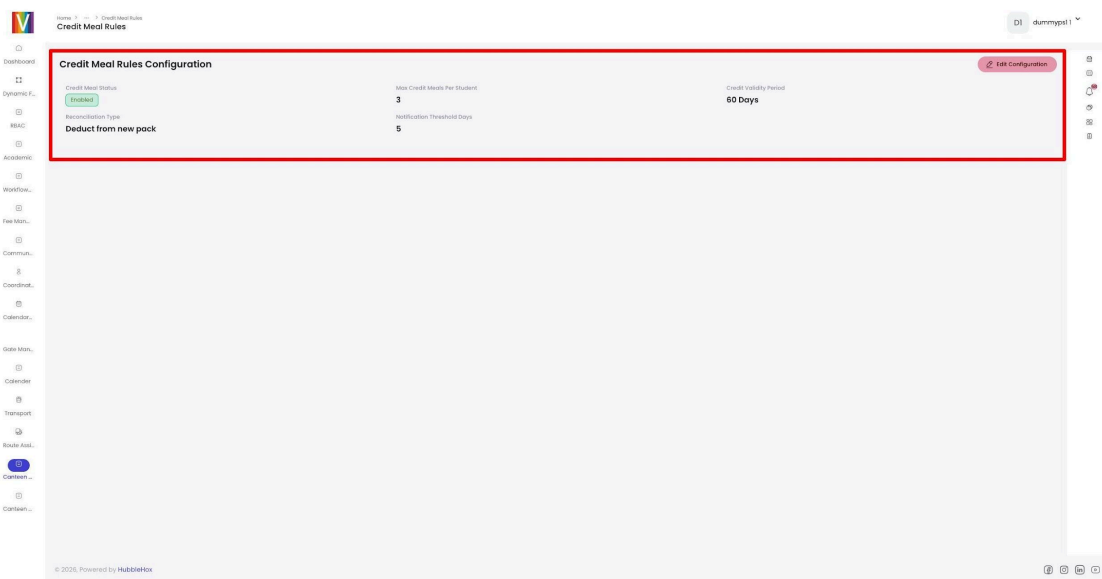

Serve Again

Serve Again – choose reason

Re-serve and the availed count: The first time you serve that meal for the day, the availed count goes up (for example from **10/12** to **11/12**). If you **Serve again** after that, the count **does not** go up. It stays the same (for example **11/12** stays **11/12**).

7. Credit meal consumption (Students only)

Credit meals are only for **students**. They are extra meals the school allows when the student's meal pack is finished or inactive, up to a limit set by the admin (e.g. 3 per student). The admin configures this in **Credit Meal Rules** (e.g. Credit Meal Status Enabled, Max Credit Meals Per Student, Deduct from new pack, Credit Validity Period). The mobile app uses these rules when you log a credit meal.

Credit Meal Rules – admin configuration

When a student has credit meals pending: On **Student Profile** you see their coupon (it can be **Inactive**) and a **Credit Meals Pending** section (e.g. “2 Credit Meals Pending”, Snacks 1/3). A pink **+ Credit Snacks** (or similar) button appears.

Student Profile – Credit Meals Pending, before credit

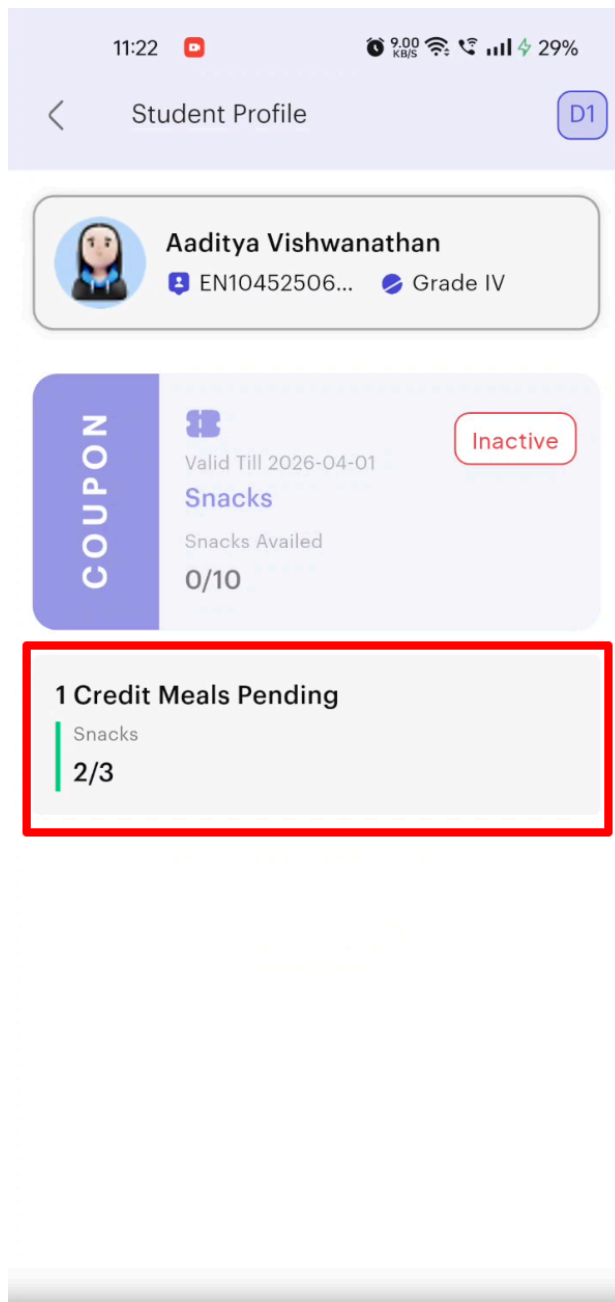

What to do: Tap **+ Credit Snacks** (or the button for that meal type). The app records one credit meal for the student.

Success dialog: A pop-up appears: **“Snacks Has Been Credited.”** Tap **OK** to close it.

Success – Snacks Has Been Credited

After credit: Back on Student Profile, the **Credit Meals Pending** count updates (e.g. from “2 Credit Meals Pending” and 1/3 to “1 Credit Meals Pending” and 2/3).

Student Profile – Credit Meals Pending updated

Outcome

You can open **Meal Logging** from the dashboard, pick a meal time, and scan ID cards. On **Student Profile** and **Staff Profile** you see plan or coupon details; you can read **Allergens** when shown. You log servings with **+ Serve ...**; after a successful serve, the availed count updates. If you must give another plate after a valid problem, use **Serve Again**, pick a **Reason**, and confirm—the availed count does not increase on that step. Students with **credit meals** can use **+ Credit ...** when the app shows credit pending.

Ala-Carte

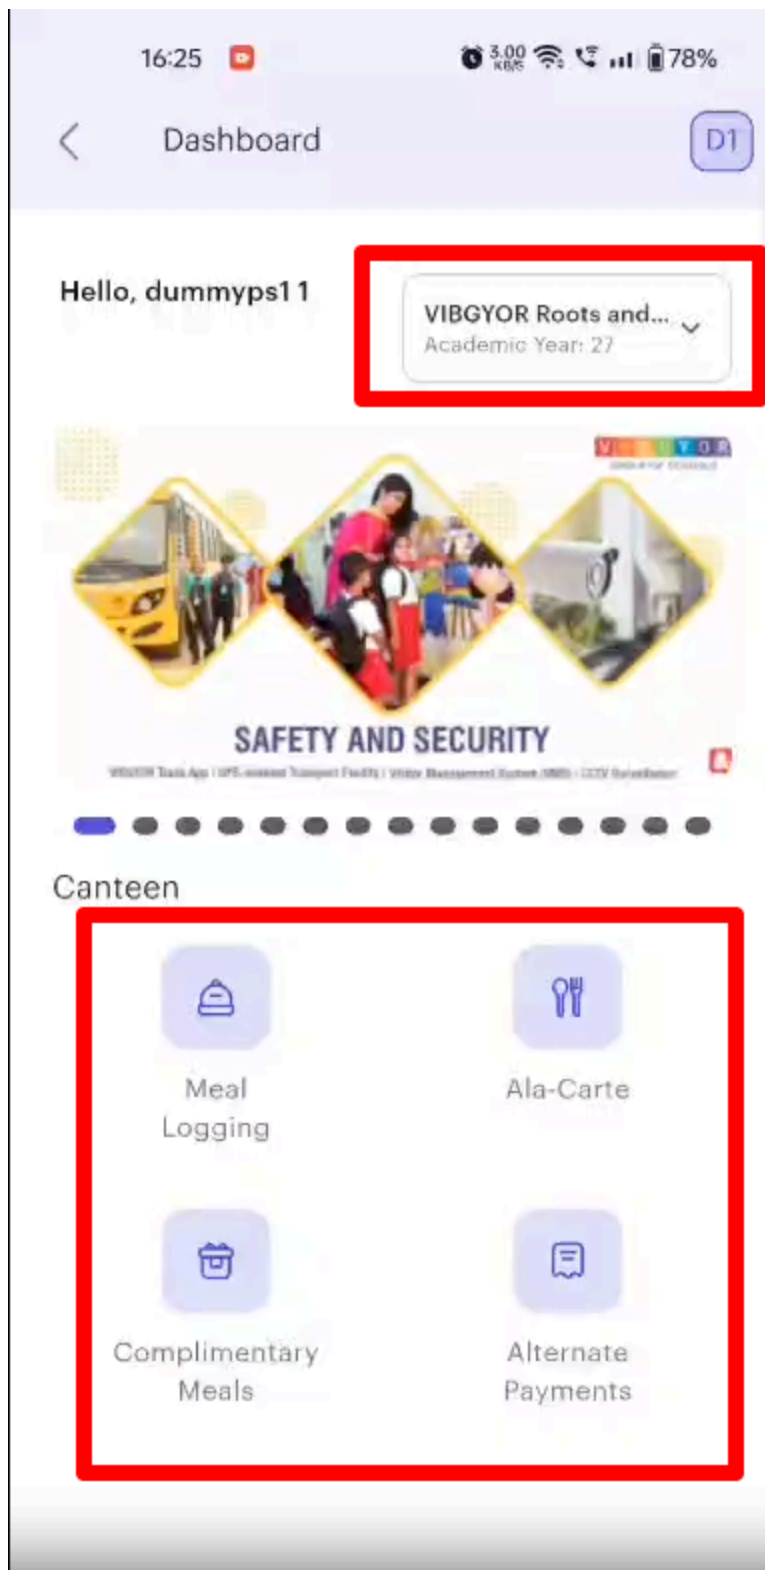

Ala-Carte is where canteen staff **scan a student's or staff member's ID card**, **pick food items** on the Menu, and **tap Pay** to charge the order to that person's **Ala-carte Balance**. For students, the school also sets how much they can spend in one day; the Menu shows that limit as **Max spend allowed today**.

Student daily spend cap

Your school or admin sets a **daily spend cap** for students. On the Menu screen you see that limit as **Max spend allowed today**. Staff members do not get this line on the Menu.

1. Open Ala-Carte (Dashboard)

From the canteen dashboard, find **Ala-Carte**.

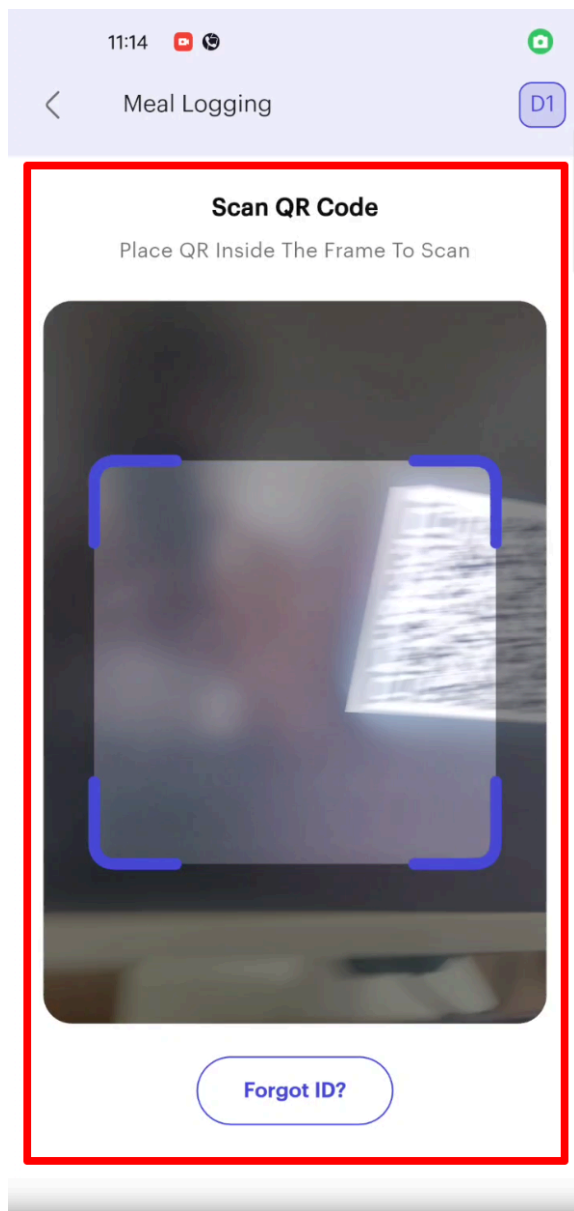

Dashboard – Ala-Carte tile

What to do: Tap **Ala-Carte** to open the ala-carte flow.

2. Scan ID card (Student or Staff)

The screen opens with a **Scan ID card** area: a frame shows where to hold the ID, with a short instruction to place the card inside the frame.

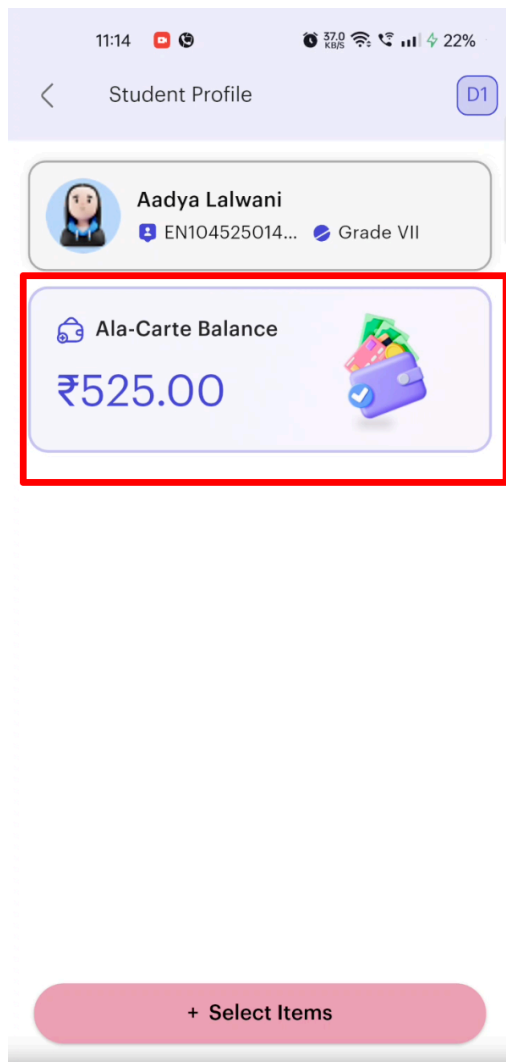

Ala-Carte – Scan ID card

What to do: Scan the student's or staff member's ID card. The app opens their profile.

3. Profile – Balance and Select Items

On the profile you see the person's name and ID. You also see **Ala-carte Balance** (read-only; it shows how much money is in their ala-carte wallet). To order food, you use the button below.

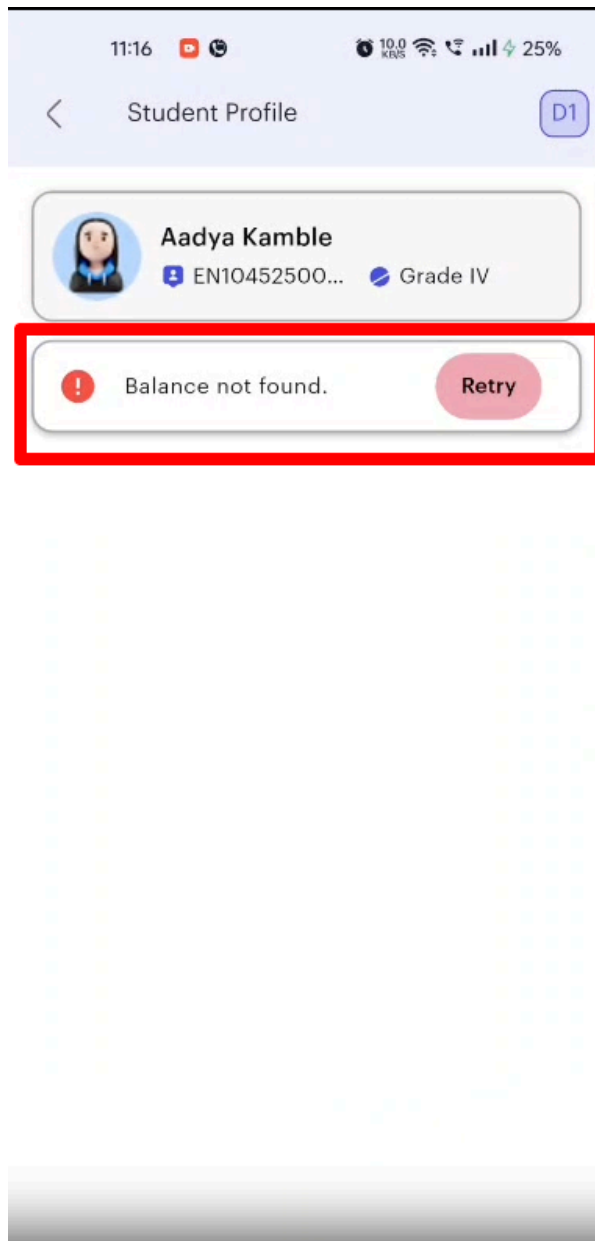

Editable action: Tap **+ Select Items** to open the **Menu** and add food.

Student Profile – Ala-carte Balance and Select Items

3.1 Balance not found

When there is **no ala-carte wallet** for this person, the profile shows **Balance not found** and a **Retry** button.

Student Profile – Balance not found

What to do: Tap **Retry** to try loading the wallet again. You need a working balance before you can place an order.

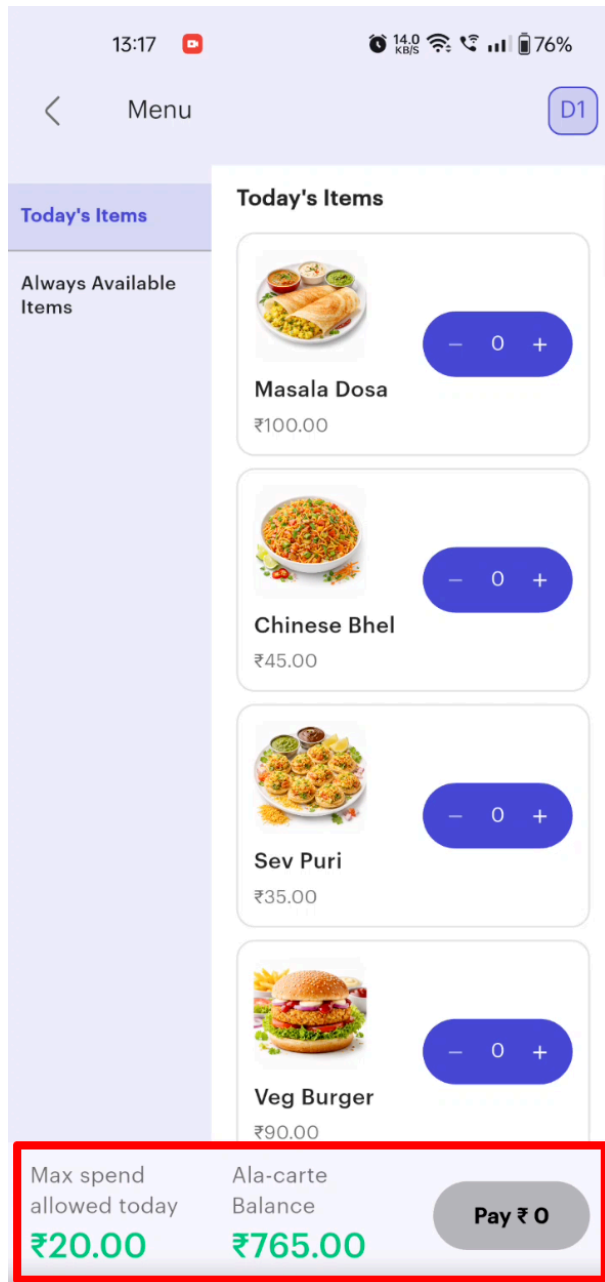

4. Menu – Pick items

The **Menu** lists food as cards: **photo**, **name**, **price**, and **quantity** with – and +. Tap + to add one portion; tap – to remove one. Each card shows a fixed price; the app adds up **Pay ₹...** for you—you do not type the total.

4.1 Student Menu (footer)

At the bottom of the Menu, students see three lines:

- **Max spend allowed today** – today's spending limit for this student.
- **Ala-carte Balance** – money left in the wallet.
- **Pay ₹...** – total for this order.

Student Menu – items and footer

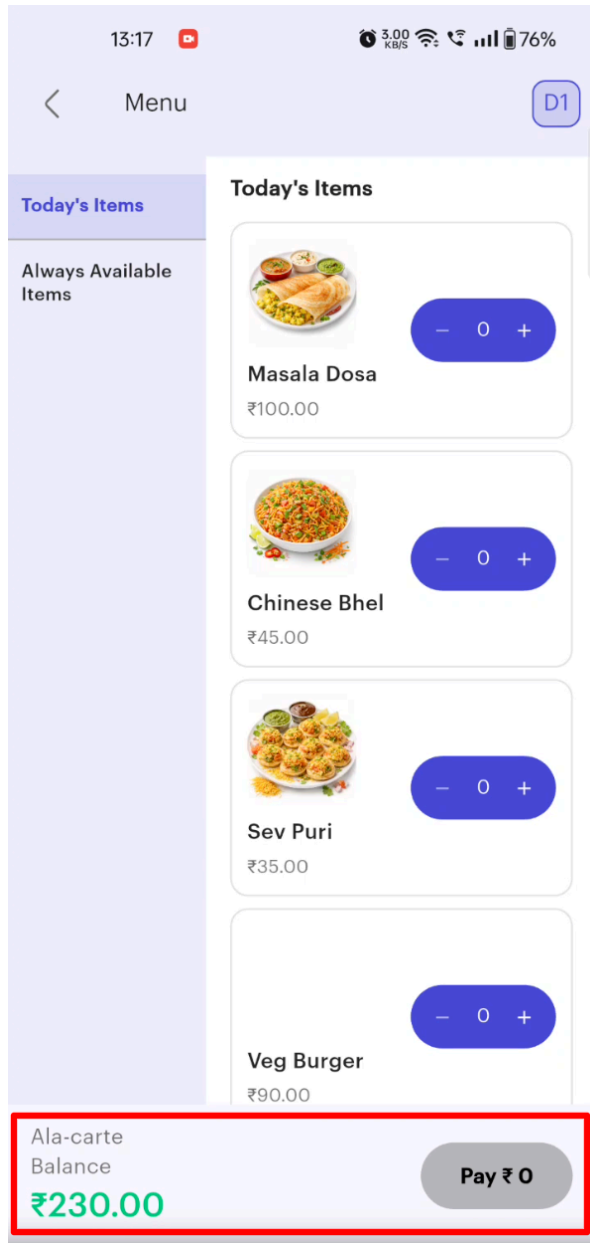

What to do: Add items until the **Pay** amount is **not more than Ala-carte Balance** and **not more than Max spend allowed today**. Then tap **Pay**.

4.2 Staff Menu (footer)

At the bottom, staff see:

- **Ala-carte Balance**
- **Pay ₹...**

Staff Menu does **not** show **Max spend allowed today**.

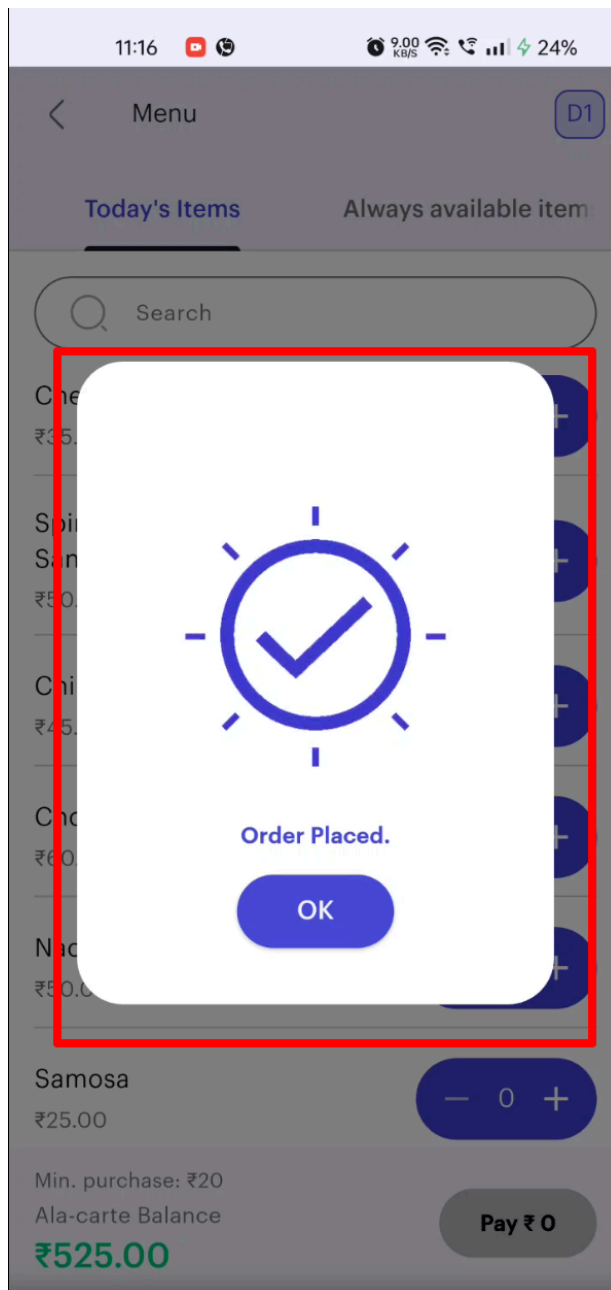

Staff Menu – items and footer

What to do: Add items until **Pay** is **not more than Ala-carte Balance**. Then tap **Pay**.

5. Place order and confirmation

Tap **Pay** to place the order. The order total comes out of the person's **Ala-carte Balance**.

Success message: A pop-up shows **Order Placed**. Tap **OK** to close it.

Order Placed – confirmation dialog

After payment: When you open this person's profile again, **Ala-carte Balance** shows the amount left after the order.

Outcome

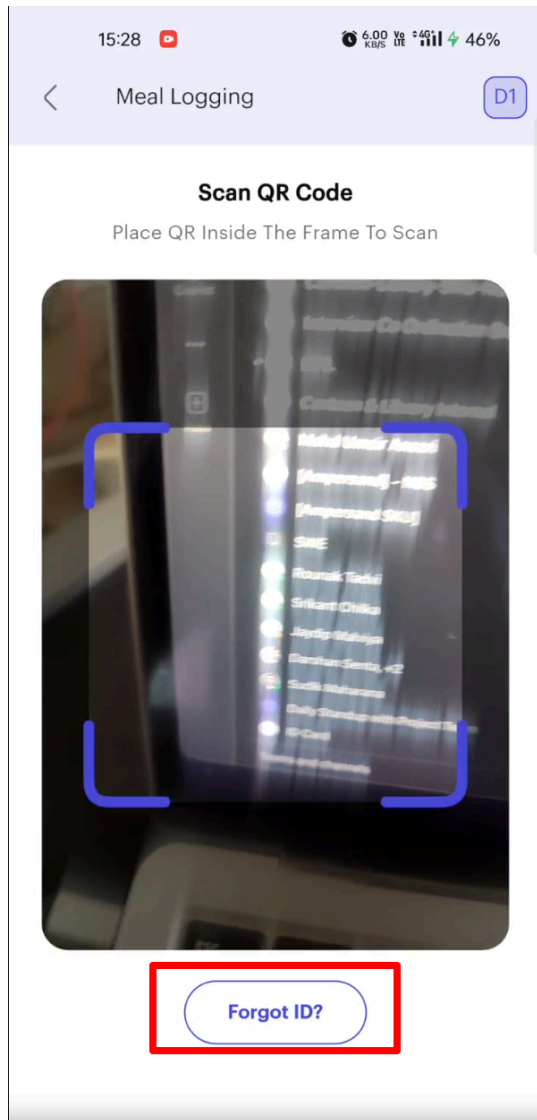

You open **Ala-Carte** from the dashboard, scan an ID, and tap **+ Select Items** when **Ala-carte Balance** shows. On the **Menu**, you change quantities with **- / +**; students see **Max spend allowed today**, **Ala-carte Balance**, and **Pay**; staff see **Ala-carte Balance** and **Pay** only. You tap **Pay** when the total fits the balance (and the student's daily cap). The app confirms with **Order Placed** and deducts the amount from the wallet.

Forgot ID Card

When someone does not have an ID card, tap **Forgot ID?** on the **Scan ID card** screen (for example in **Meal Logging** or **Ala-Carte**). The app asks who you are looking for, which **school** to use, then **Search Student** or **Search Staff** so you can open the right **Student Profile** or **Staff Profile** without scanning a QR code.

1. Tap Forgot ID?

You are on **Scan ID card** with the camera frame and the line that tells you to place the ID inside the frame. At the bottom you see **Forgot ID?**.

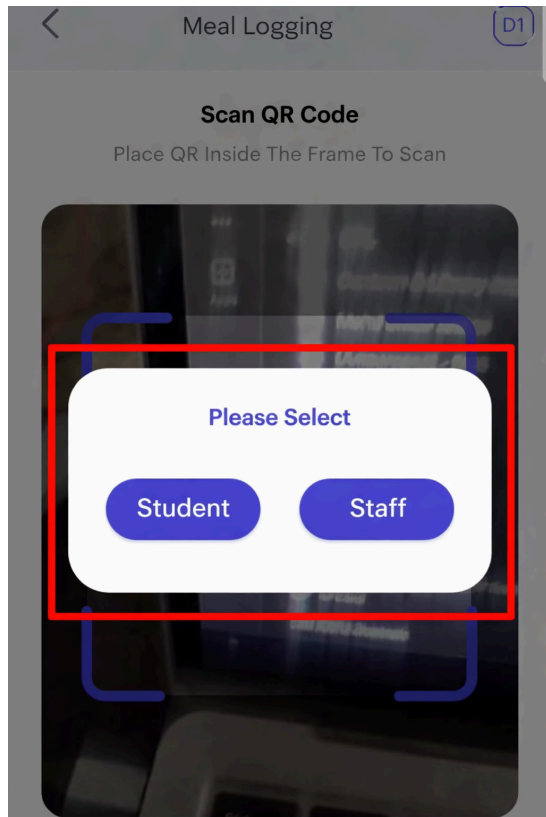

Scan ID card – Forgot ID?

What to do: Tap **Forgot ID?**.

2. Please Select – Student or Staff

The app shows **Please Select** with two large choices: **Student** and **Staff**.

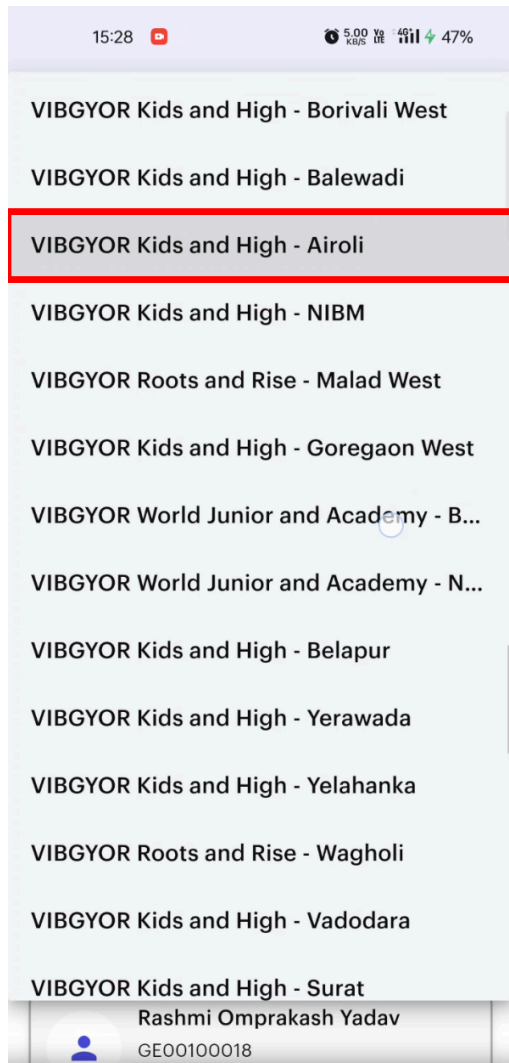

Please Select – Student or Staff

What to do: Tap **Student** to look up a student. Tap **Staff** to look up a staff member.

3. Select School

A **school** list opens. Pick the school this person belongs to.

School list

What to do: Tap the correct school. The next screen depends on whether you picked **Student** or **Staff** in step 2.

4. Student path – Search Student

After **Student** + school, the app opens **Search Student**.

Editable: **Select Grade**, **Select Division**, and the **search** bar. **School** is already set from step 3.

4.1 Select Grade

Tap **Select Grade**. A list shows grades for that school.

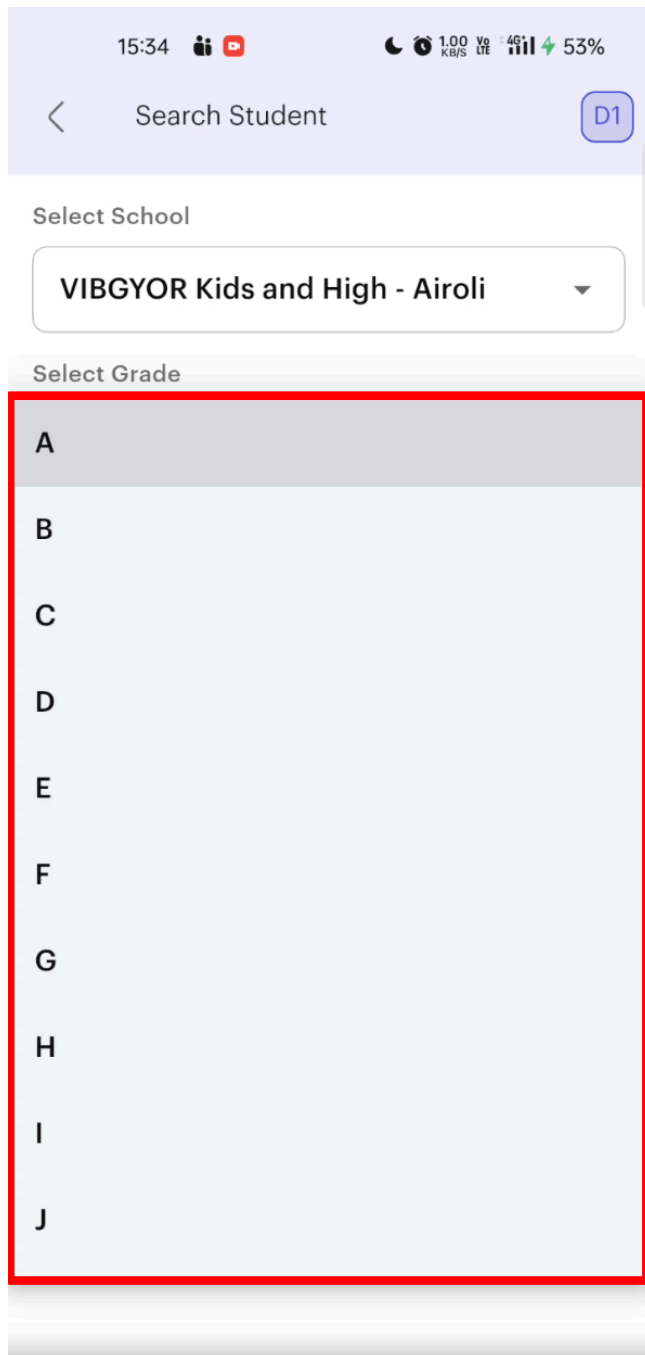

Search Student – grade list

What to do: Tap the student's grade.

4.2 Select Division

Tap **Select Division**. A list shows divisions for that grade.

Search Student – division list

What to do: Tap the student's division.

4.3 Search and pick a student

Use the **search** bar to type part of the student's name. The list below updates.

The screenshot shows a mobile application interface for searching students. At the top, there's a status bar with the time 15:21, network icons, and battery level at 67%. Below the status bar is a header with a back arrow, the text 'Search Student', and a 'D1' button. The main content area is divided into three filter sections, each with a dropdown menu: 'Select School' (VIBGYOR Kids and High - Airoli), 'Select Grade' (All Grades), and 'Select Division' (Select grade first). These filter sections are highlighted with a red border. Below the filters is a search bar with a magnifying glass icon and the text 'Search'. Under the search bar is a list of three student entries, each with a profile picture, name, ID number, and division/grade information.

Student Name	ID Number	Division & Grade

	Vinita Manoj Yadav GE00101269 Primary CISCE Subject Teacher
	Tanuja Shivkumar Yadav GE00103242 Secondary CISCE Subject Teacher
	Amit Kumar Yadav GE00107028 Business Corporate-Schools Marketing Lead

Search Staff – school and search

What to do: Check that **school** is correct. Type in **search** to find the person. Tap the correct **staff** row. The app opens that staff member's profile.

Outcome

Forgot ID? lets you skip the QR scan. You tap **Forgot ID?**, pick **Student** or **Staff**, pick **school**, then either set **grade** and **division** and search for a **student**, or search and select a **staff** member. The profile that opens is the one you use for **Meal Logging** or **Ala-Carte**, same as after scanning an ID card.

Complimentary Meals

Complimentary Meals is for **visitors** who get **free** meals or drinks from the canteen. You pick the **school**, enter **visitor** details, tick **meal types** (lunch, snacks, and so on), add **ala-carte** items when the visitor also gets extra food from the menu, pick **who requested** the meal (a staff member), and tap **Place Order**. The order does **not** charge the visitor.

1. Open Complimentary Meals and fill Visitor 1

From the **canteen dashboard**, under **Others**, tap **Complimentary Meals**.

The **Complimentary Meals** screen opens. At the top you choose **school** from the dropdown. Under **Visitor 1** you fill the fields the app shows.

Editable: **School**, **Visitor Phone Number**, **Visitor Name**, and other visitor fields on the form.

☐ Tea ☐ Coffee

Ala Carte

Notes

Complimentary Meals – school and Visitor 1

What to do: Select the **school**. Enter the visitor's **phone** and **name**. Complete any other lines on the form (for example notes) before you move on.

2. Choose meal types

Tick one or more boxes for what the visitor receives:

- **Lunch**
- **Snacks**
- **Evening Snacks**
- **Tea**
- **Coffee**

A tick means that meal type is included. You can pick more than one.

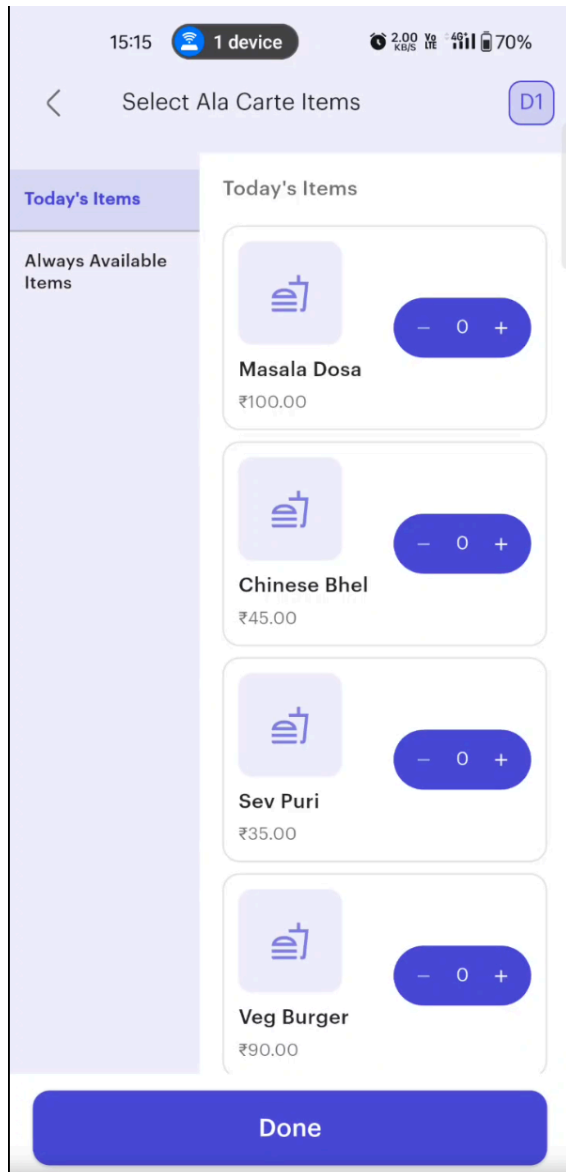

The screenshot shows a mobile app interface for 'Complimentary Meals'. At the top, the status bar shows 15:15, 1 device, 2.00 KB/s, 4G LTE, and 70% battery. The app header has a back arrow, 'Complimentary Meals', and a 'D1' badge. Below the header, a dropdown menu shows 'AKSnay Kumar'. The main form is titled 'Visitor 1' and contains fields for 'Visitor Phone Number' (8888601944) and 'Visitor Name' (Jatin). A red rectangle highlights a section with meal type options: 'Lunch' (checked), 'Snacks' (unchecked), 'Evening Snacks' (unchecked), 'Tea' (checked), and 'Coffee' (unchecked). Below this is an 'Ala Carte' button, a 'Notes' text area, and a 'Selected Items' list showing 'Tea' and 'Lunch x1'.

Meal type – Lunch, Snacks, Evening Snacks, Tea, Coffee

What to do: Tick every type that applies to this visitor.

3. Add ala-carte items

Tap **Ala Carte** to open **Select Ala Carte Items**. Each row is a food or drink with a price. Use – and + to set **quantity**. Tap **Done** to return to the main form.

Select Ala Carte Items – quantities

What to do: Set – / + for each extra item the visitor receives, then tap **Done**. Visitors who only get the meal types from step 2 do not need items from this screen.

4. Review Selected Items

The form shows a **Selected Items** box. After you use **Ala Carte**, this box lists each **item** and **quantity**.

Read-only: The box is a summary. To change quantities, open **Ala Carte** again (step 3).

The screenshot shows a mobile application interface for 'Complimentary Meals'. At the top, the status bar displays the time 15:15, signal strength, 1 device connected, and 69% battery. The app header includes a back arrow, the title 'Complimentary Meals', and a table icon labeled 'D1'. The main content area has a light gray background and contains several sections: a list of meal categories with checkboxes ('Snacks', 'Evening Snacks', 'Tea' (checked), 'Coffee'), an 'Ala Carte' button, a 'Notes' text input field, and a 'Selected Items' box highlighted with a red border. The 'Selected Items' box lists: 'Tea', 'Lunch x1', 'Chinese Bhel x2', 'Masala Dosa x1', and 'Real Mixed Fruit Juice x1'. At the bottom, there are two buttons: '+ Add Visitor' and 'Place Order'.

Place Order

Order Placed! – dialog

Outcome

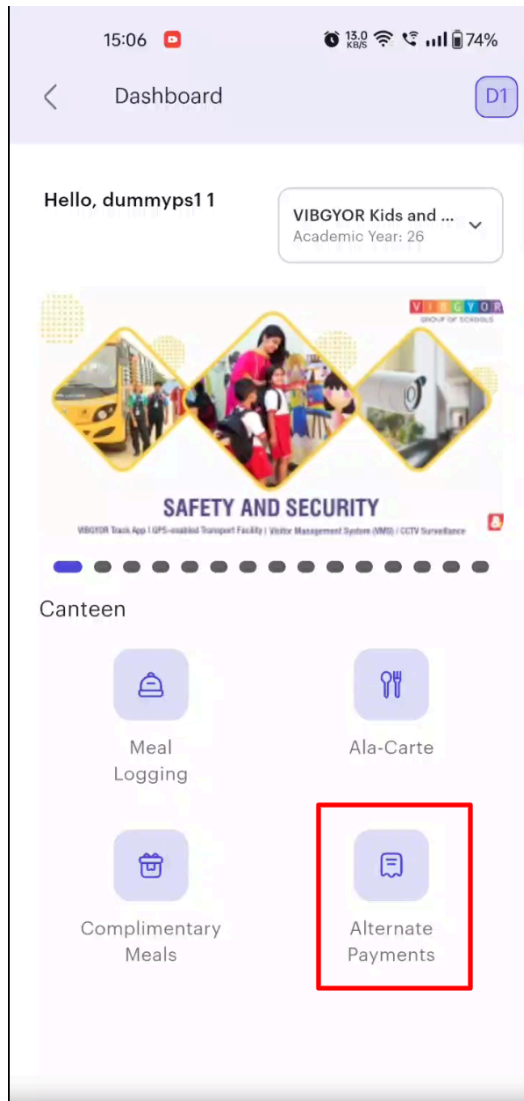

You open **Complimentary Meals** from the dashboard, set **school** and **Visitor 1** details, tick **meal types**, add **ala-carte** items when the visitor gets extras from the menu, check **Selected Items**, choose **Requested by**, and tap **Place Order**. The app confirms with **Order Placed!**

Alternate Payments

Alternate Payments is for **guests or outsiders** who buy **ala-carte** food at the canteen and **pay on the spot**. You do **not** scan a student or staff ID. You open the **Menu**, add items with **- / +**, tap **Pay**, and the guest completes **payment**. The **school** on the **canteen dashboard** applies to this sale.

1. Open Alternate Payments (Dashboard)

On the **canteen dashboard**, the **School selector** sets which school this sale belongs to. Tap **Alternate Payments**.

Dashboard – Alternate Payments tile

What to do: Tap **Alternate Payments** to open the **Menu**.

2. Menu – pick items

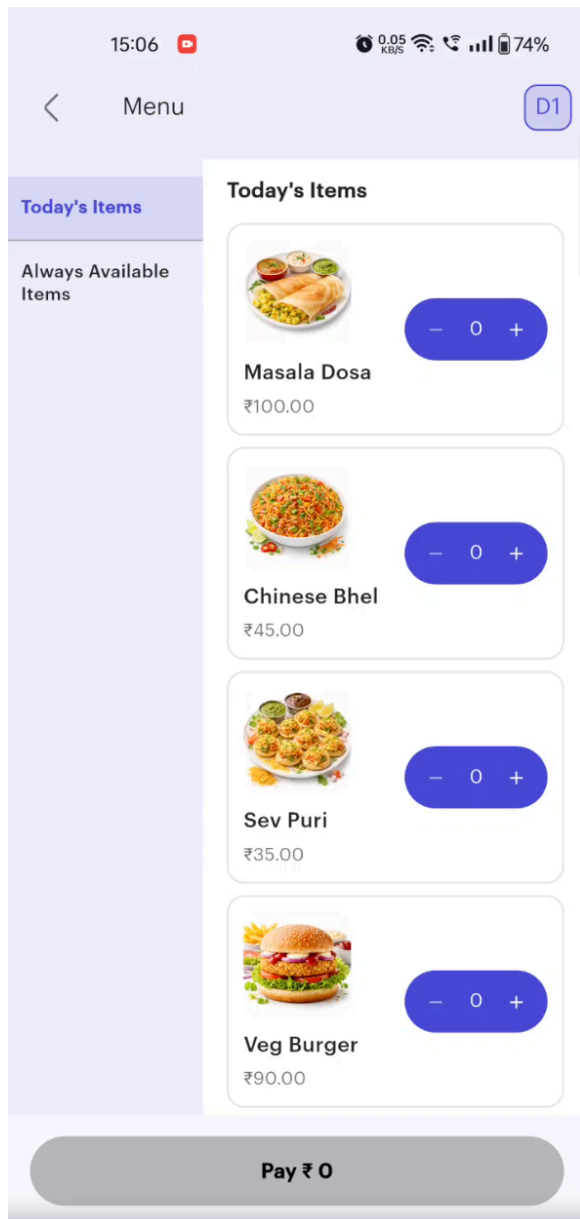

The **Menu** lists two groups:

- **Today's Items**
- **Always Available Items**

Each row shows the **item**, **price**, and **quantity** with **–** and **+**.

Editable: Quantity on each row. **Read-only:** Item name and unit price on the card.

At the bottom, **Pay ₹ 0** shows when no item has quantity yet.

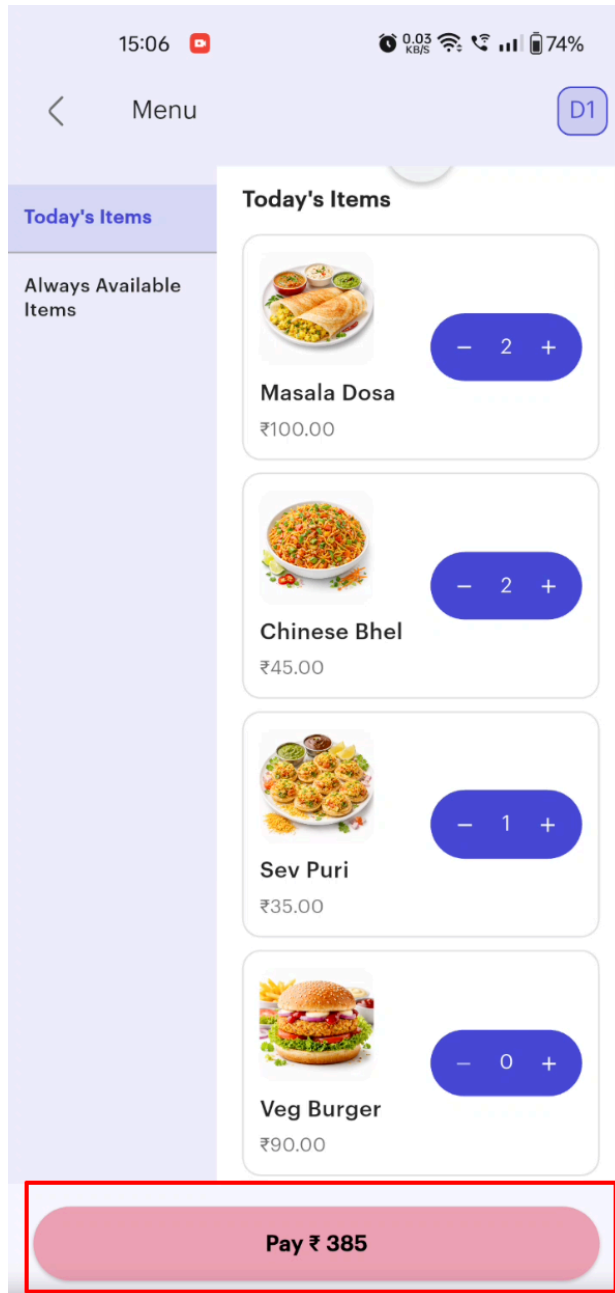

Menu – Today's Items and Always Available

What to do: Tap **+** to add and **–** to take away. The app updates **Pay ₹...** as you go.

3. Check total and tap Pay

When quantities are set, **Pay ₹...** shows the full amount for this order (e.g. **Pay ₹ 385**).

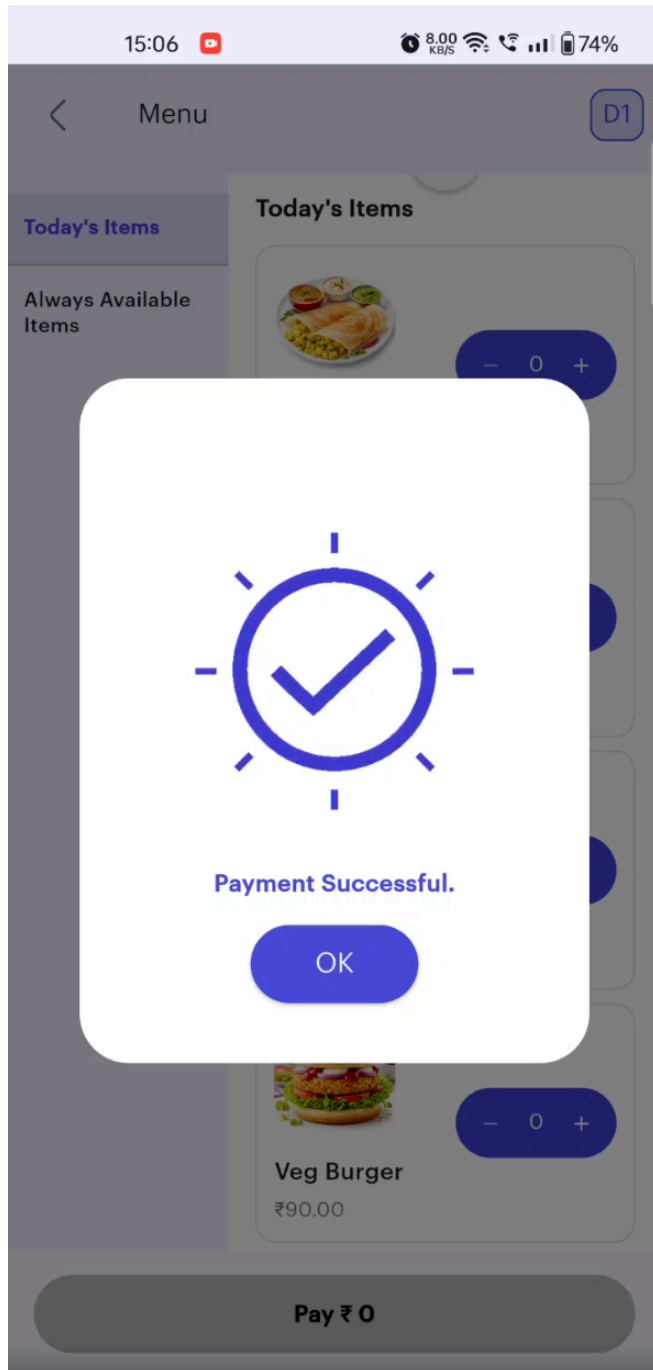

Menu – Pay total after selection

What to do: Check the amount. Tap **Pay**, then complete each payment screen until the payment finishes.

4. Payment Successful

Success message: A pop-up shows **Payment Successful**.

Payment Successful – dialog

What to do: Tap **OK** to close the message.

Outcome

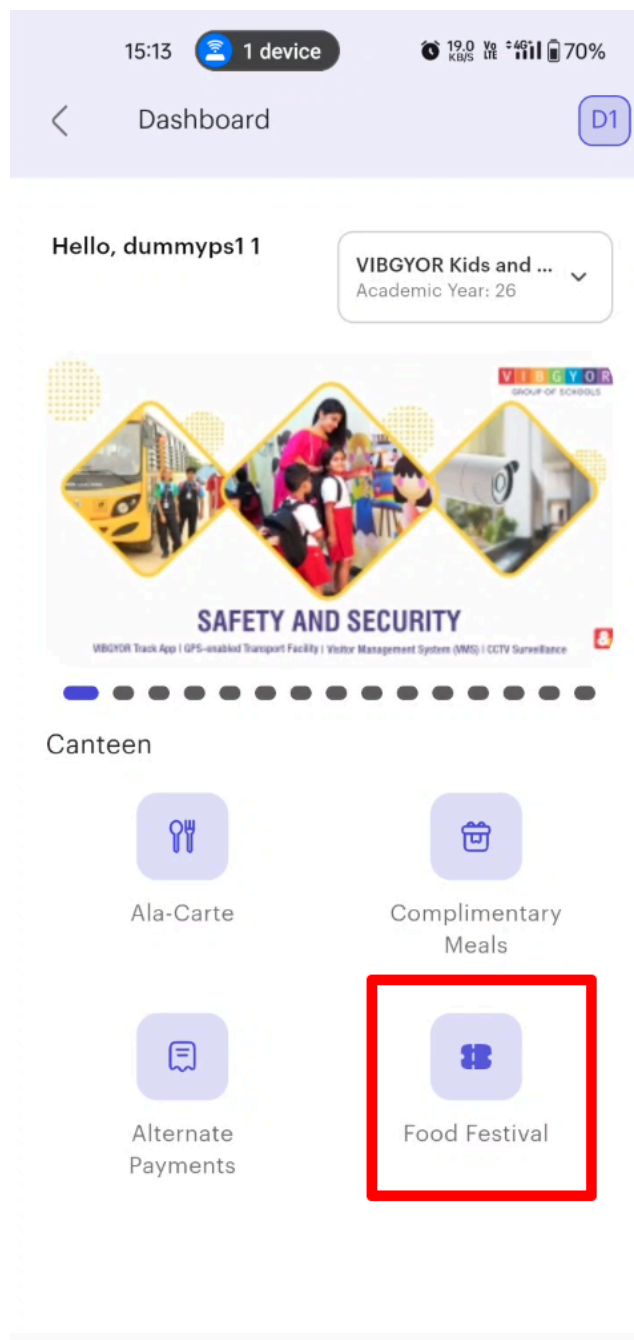

You open **Alternate Payments** from the **canteen dashboard**, add items on the **Menu** from **Today's Items** and **Always Available Items**, check **Pay ₹...**, tap **Pay**, finish payment, then tap **OK** on **Payment Successful**.

Food Festival

Food Festival is for serving meals against **food festival coupons** that **students or staff** bought for the event. Canteen staff **scan the coupon QR code**, set **Meals to serve**, tap **Serve Meal**, and the app updates **Consumed** (served out of total). While a food festival is **happening** today for the **school** in the **School selector**, this tile **replaces Meal Logging** on the dashboard.

1. Open Food Festival (Dashboard)

On the **canteen dashboard**, tap **Food Festival**. You see this tile **instead of Meal Logging** when a food festival is **happening** today for the selected school.

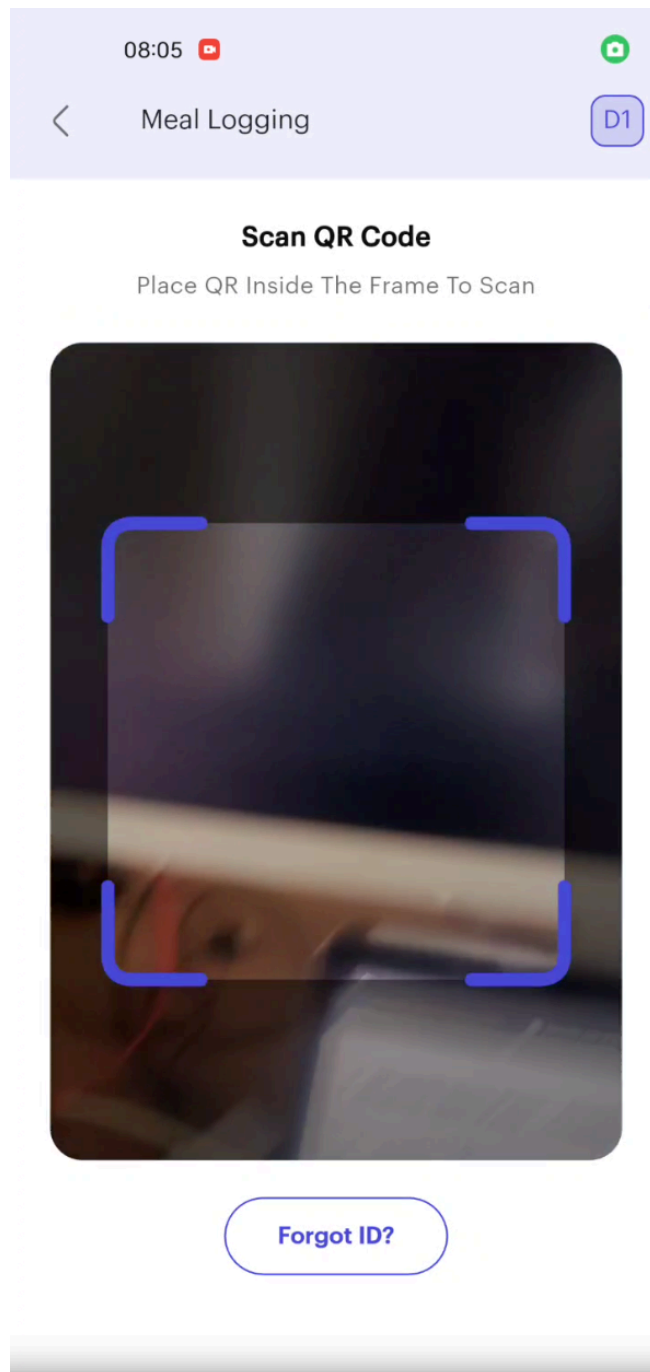

Dashboard – Food Festival tile

What to do: Tap Food Festival.

2. Scan the coupon QR code

The **Scan QR code** screen opens (camera frame and short instruction). Point the camera at the **coupon QR code** on the person's phone or paper.

Food Festival – Scan QR code

What to do: Scan until the app opens **Food Festival Coupons**.

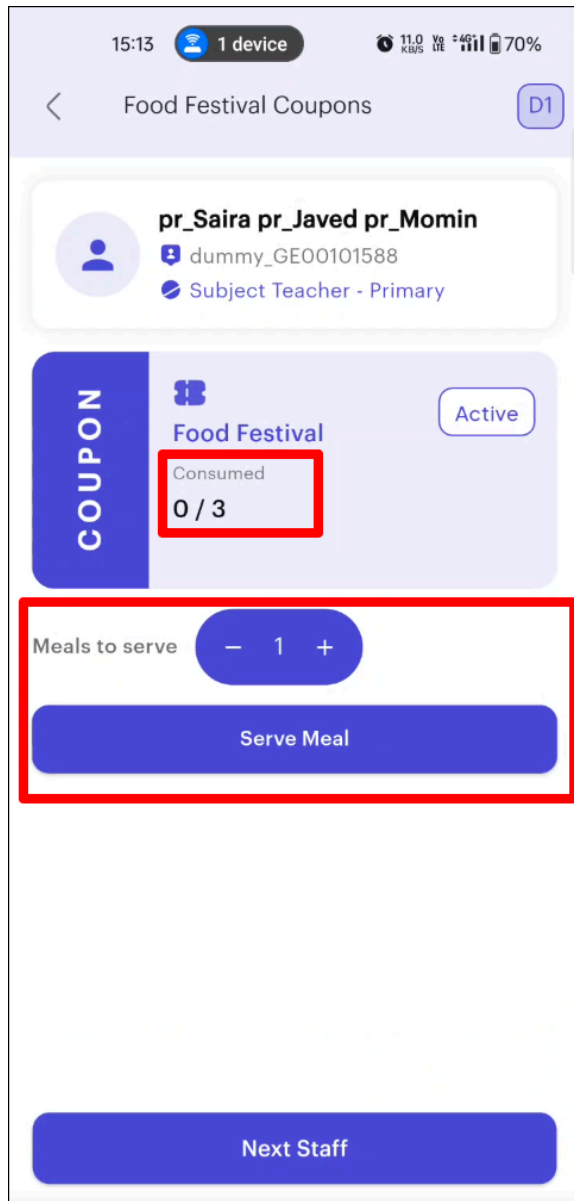

3. Food Festival Coupons – set meals and serve

The **Food Festival Coupons** screen shows:

- **Coupon status** (e.g. **Active**).
- **Consumed** – served meals out of the total (e.g. **0 / 3**).

Read-only: **Coupon status** and **Consumed** (the app updates **Consumed** after each successful serve).

Editable: **Meals to serve** – use **–** and **+** for how many meals you are serving in this action.

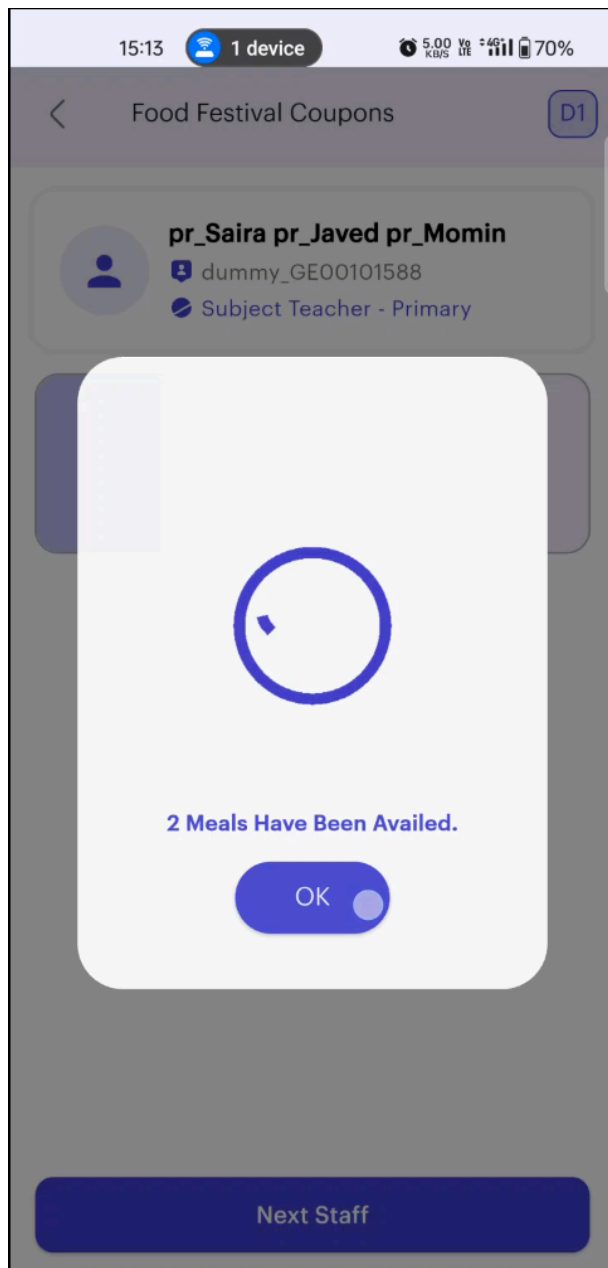

Food Festival Coupons – Consumed and Serve Meal

What to do: Check **Consumed** and the total. Set **Meals to serve**, then tap **Serve Meal**.

4. Success message

Success message: A pop-up shows how many meals were served (e.g. **2 Meals Have Been Availed.**).

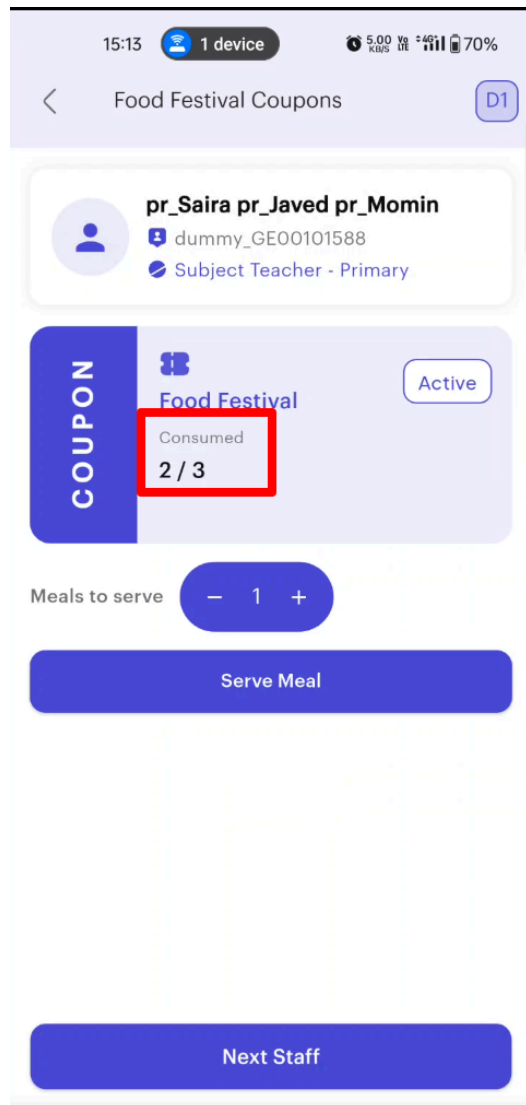

Serve Meal – success dialog

What to do: Tap **OK** to close the pop-up.

5. Consumed count after serve

Back on **Food Festival Coupons**, **Consumed** goes up (e.g. from **0 / 3** to **2 / 3**).

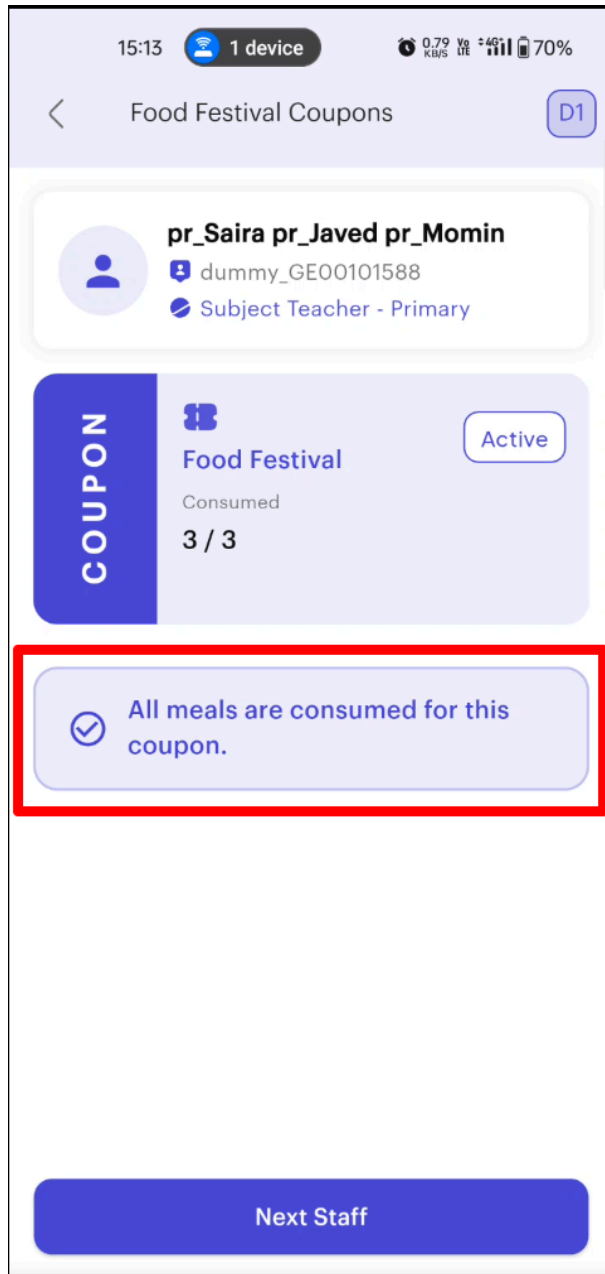

Food Festival Coupons – updated Consumed

What to do: If this coupon still has meals left, set **Meals to serve** again and tap **Serve Meal**. Otherwise scan a different coupon or leave the screen.

6. All meals consumed for this coupon

Consumed reaches the full total (e.g. **3 / 3**). The app shows: **All meals are consumed for this coupon.**

Food Festival – all meals consumed

What to do: Do not tap **Serve Meal** again for this coupon—there are no meals left on it.

Outcome

You open **Food Festival** from the **canteen dashboard**, **scan** the coupon **QR code**, set **Meals to serve**, tap **Serve Meal**, tap **OK** on the success dialog, and see **Consumed** go up. When **Consumed** reaches the full total, the app shows **All meals are consumed for this coupon**.
